IDENTIFIERS	*United States

ABSTRACT

A guide to U.S. scholarships and colleges is presented for foreign students, along with information on the U.S. educational system, selecting a college, types of college financing, immigration rules, and preparation for coming to America. In addition to detailed profiles for more than 1,100 colleges, charts provide information for more than 3,000 colleges, including: the type of institution, cost, male and females enrollments (total and for foreign students), tests required for admission, whether a campus visit and interview are required or recommended, the application fee, the percent of foreign students offered admission in 1985, whether the college accepts transfer students, the average financial award offered to foreign students, the types of awards, the availability of housing for foreign students, the type of school calendar, and whether the college offers English as a Second Language programs. Included are: worksheets to help choose a college; Immigration and Naturalization Service (INS) forms; U.S. population and climate maps; addresses of centers/agencies in foreign countries that provide information about U.S. education and about Fulbright-Hays Scholarships; and addresses and phone numbers of foreign embassies in the United States and INS district and suboffices. DEDICATION

To Arti for her inspiration and motivation. To Barbara Latour and the Manek family for their support. To Shawn, Meera, and Sheena for their future. To all aspiring students, with the hope this guide changes their lives for the better. To the USA, a land of freedom and opportunity. And finally, to higher education. May it help to alleviate poverty, hunger, and misery throughout the world.

PUBLISHER'S NOTE

The data contained in **Scholarships for International Students** was provided by thousands of colleges and universities across the United States. Care and diligence have been taken in organizing and presenting the data, however, neither Scholarship Research Group nor Octameron Press guarantees its accuracy. **Scholarships for International Students** was prepared as a general reference, and should not be considered a substitute for first-hand research by its readers.

PREFACE

If you are making plans to study abroad, you have a number of countries from which to choose. If the United States is one of those countries, you need the information provided in this book.

The United States education system has developed in response to the needs of a diverse population. It may, therefore, seem large and complex (as well as expensive). It is also of very high quality, and adaptable to any and all career and personal goals. Consider the following:

- The United States has over 3000 institutions of higher learning from which to choose.
- Collectively, these institutions offer the student hundreds of major fields of study.
- The United States is among the most technologically advanced nations in the world.
- The diverse geography and climate of each region of the United States can suit nearly any preference.
- The purpose of this book is to introduce international students to higher education in the United States.

The Introduction describes the international student population in the United States — who they are, where and what they study, and how they are financed.

Part I emphasizes college selection. We provide insight into the United States educational system. We outline a method by which students can narrow their choice of schools. And we explain the entire application and admission procedure.

Part II concentrates on college financing. We first outline college costs and then describe forms of financial assistance which may enable students to meet those costs.

Part III explains the basic rules of immigration for students on a FIRST visa.

Part IV helps the student make final preparations for coming to the United States. We give the student a general understanding of customs and lifestyles in the United States.

Part V consists of United States maps. The student will find outline maps, climate maps, and a population map.

Parts VI and VII contain listings of U.S. colleges and universities. These listings include school addresses, admissions requirements, financial aid information, and types of international student support programs.

Throughout the book students will find helpful addresses and reference book listings which will provide additional needed information.

We hope that by reading this book and following its advice, students will be able to select the school which best meets their needs, finance themselves at that school, and adjust easily to living abroad.

The book is geared toward undergraduate students, but much of the information applies to graduate students as well.

INTRODUCTION

In 1984-85 there were nearly 350,000 international students in the United States. The most recent International Student Census conducted by the Institute of International Education reveals who these students are, what and where they study, and how they are financed. Complete study results may be found in Open Doors 1984/85 ($29.95 from the IIE, 809 United Nations Plaza, New York, NY 10017, USA). The following paragraphs, based on that study, provide a summary.

INTERNATIONAL STUDENT CHARACTERISTICS

Approximately 70% of international students are male. Eighty percent are single. Eighty-three percent hold student visas (F-visas). The largest group of students comes from South and East Asia (143,680). A breakdown of the international student population by country shows Taiwan to be the most highly represented nation with 22,590 students, followed by Malaysia (21,720), Nigeria (18,370), Iran (16,640), Republic of Korea (16,430), Canada (15,370), India (14,610), Japan (13,160), Venezuela (10,290), Hong Kong (10,130), and China (10,100).

ACADEMIC CHARACTERISTICS

Engineering was the most popular field of study among international students (with 75,370 enrolled as engineering majors), followed by Business and Management (64,930), Mathematics, Computer and Information Sciences (35,630), Physical and Life Sciences (24,970), and Social Sciences (17,370). Nearly 20,000 international students had no declared major field of study. This is not surprising. In the United States, students normally do not declare a major field of study until their second or third year of study.

Eighty-eight percent of international students attend four-year colleges and universities (as compared to 60.7% of U.S. students). Twelve percent attend two year colleges.

Sixty-five percent attend public institutions (as compared to 78.4% of U.S. students). Thirty-five percent attend private institutions.

Twelve percent of international students are working toward an associates degree, 46% toward a bachelor's degree and 36% toward a graduate degree. The remaining 6% are in non-degree programs, or English language programs.

PRIMARY FINANCIAL SUPPORT

The primary source of financial support for most international students is personal and family funding (67%). Twelve percent rely on support from their home government, 11% rely on support from the institution they attend, 3% on private international sources, 2% on employment, 2% on the U.S. government, and 2% on private U.S. sources.

Customs And Lifestyle

CHAPTER 1
The United States Education System

TYPES OF ACADEMIC INSTITUTIONS

Educational institutions in the United States are differentiated primarily by the nature of their academic programs. The different institutions are as follows: elementary school, junior high school, high school, technical school, two-year college, four-year college, and university.

Elementary and High School

Most United States students have completed twelve years of education by the time they enter college. Each year is known as a "grade" (first grade, second grade, third grade, and so on). Formal education begins with elementary school when children are around 5 or 6 years of age. It continues through junior high school (or middle school), and finally high school.

Different school systems divide the twelve years of pre-college education in a variety of ways. For example, in some systems, students attend one school for six years of elementary education, another school for three years of junior high education, and a third for three years of high school education. Other plans include eight years of elementary school and four years of high school; or six years of elementary school, two years of junior high school, and four years of high school.

Most state governments have laws that require students to stay in school until they are 16 years of age, but it is hoped they will complete (or graduate from) high school.

No matter how a school system is organized, when students begin ninth grade, they choose the focus of the rest of their curriculum. Programs choices are as follows:

- *An academic program of studies.* Students who plan to go to college generally prepare themselves by taking four years of English, three or four years of mathematics, two or three years of physical and natural science, two or three years of social science, and two or three years of a foreign language.
- *A vocational program of studies.* Students who intend to seek employment in a trade, such as mechanics, plumbing, or carpentry, are able to learn these skills as well as English, mathematics, and science.
- *A commercial program of studies.* Students who want to enter the business world can develop their office skills by learning typing, bookkeeping, and business mathematics.

Technical School

Technical schools offer occupational programs of study which are one or two years in length. They are designed to train a student for a technical job such as dental hygienist or computer technician.

Two-Year College

Two-year colleges are also known as junior colleges or community colleges. They offer several programs of study to serve a variety of student needs. Each is one-to-two years in duration. The liberal arts program is similar to the first two years of a four-year college or university (see below) and prepares students for transfer to a four year institution. Pre-professional programs such as pre-engineering, pre-business, and pre-education, also prepare students for further education. And finally, technical courses lead to a terminal degree such as that offered by a technical school.

Four-Year Colleges

Four-year colleges are also known as undergraduate colleges, liberal arts colleges, or colleges of the arts and sciences. As these names suggest, the degree program is four years long and focuses on humanities, natural and physical sciences, and social and behavioral sciences. More recently, professional fields such as business administration, computer science, nursing, and teacher training have been added.

Universities

The university is the most complex form of educational institution. It offers undergraduate study as well as more advanced graduate and professional study.

The undergraduate division of the university is usually known as the College of Arts and Sciences. It is similar to a four-year college (as discussed above).

Graduate programs consist of study in a single subject which goes beyond the scope of an undergraduate program. Graduate divisions of the university are known by such names as the Graduate School of the Humanities or the Graduate School of the Social Sciences.

Professional study also refers to study beyond the level of an undergraduate program. However, this study combines theoretical material with professional training in a field such as law, medicine, or business. Accordingly, professional divisions of a university are known by such names as College of Medicine or Graduate School of Medicine, College of Business Administration or Graduate School of Business Administration.

One word of caution. The terms used to describe these institutions of higher learning are often used interchangeably. For example, "school" is often used as an alternative to "college" or "university," with no implication of secondary standing.

TYPES OF DEGREES OFFERED

Each kind of academic institution awards a different type of degree upon completion of a required program of study. These degrees are as follows: high school diploma, associate's degree, bachelor's degree, master's degree, professional degree, and doctor's degree. In each case, as physical evidence of their academic accomplishment, the student receives a paper or parchment document signed by an officer of the institution.

High School Diploma

A diploma is awarded to students after they complete twelve years of education. The same diploma is awarded regardless of whether a student follows an academic, vocational, or commercial program of study during high school.

Associate's Degree

An Associate of Arts (abbreviated A.A.) or an Associate of Science (A.S.) is awarded by a two-year college to students after one to two years of full time study beyond the high school level. The credentials earned in some A.A. and A.S. programs may often be applied toward a degree from a four-year institution, depending upon the course of study and the policy of the four-year institution. Many associate degrees are terminal.

Bachelor's Degree

A Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) is awarded by a college or university to students after four years of intensive full time study beyond the high school level. Most institutions determine what kinds of courses a student must take in order to be eligible for this degree. Typical requirements are as follows:

- *A major field of study.* Students normally choose their "majors" before their third year of college. A major may be in a traditional field such as history or economics. Or a major may combine fields to form an interdisciplinary major such as Environmental Studies or International Relations.
- *A distribution of courses* in the sciences, social sciences, and humanities. Some institutions require students to take specific courses to graduate. These schools have what are known as general education requirements. Other schools give students more freedom in selecting their courses. They still expect, however, that the student will take a minimum number of courses in each of the above mentioned areas.
- *Electives.* These are courses that may be taken in any field the student chooses, regardless of whether or not an institution has general education requirements.

Other bachelor's programs include: Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B.Mus.), Bachelor of Education (B.Ed.) and Bachelor of Business Administration (B.B.A.).

Master's Degree

A Master of Arts (M.A.) or Master of Science (M.S.) is awarded by a university to a student who has completed one to two years of full time study beyond the undergraduate level.

Requirements for a master's degree vary among programs and institutions. Completion of the program might require a research project or thesis, a comprehensive examination, and/or proficiency in one or more languages.

Large universities will have graduate programs in up to 100 disciplines. A bachelor's degree, or its equivalent, is nearly always required for admission.

Professional Degree

A professional degree is awarded by a university to a student who has completed the degree requirements of a professional program such as medicine, law, or business.

Professional degree programs vary in length. A Master of Business Administration (M.B.A.) takes two years of full time study. A Juris Doctor (J.D.) or law degree takes three years of full time study. A medical degree (M.D.) takes four years of full time study.

Admission to all of these programs is highly competitive and nearly always requires the completion of a bachelor's degree or its equivalent for admission.

Doctoral Degree

A Doctor of Philosophy (Ph.D.) is the highest degree awarded by United States educational institutions. It is given to students upon completion of a demanding program of advanced study and research.

The requirements for a Ph.D. vary among programs and institutions. In general, the student must complete two years of course work beyond the masters level, take qualifying examinations which measure general knowledge of the field, and engage in advanced original research. The candidate writes up the results of this research into a document known as a dissertation. The entire process can take from two to five years of work, after the candidate has completed a master's or professional degree.

The doctoral program is highly individual and performed under close supervision of a faculty advisor.

PUBLIC AND PRIVATE INSTITUTIONS

Colleges and universities are considered either public or private depending on the primary source of their operating budget.

Public (or State) Schools

Each state in the United States has established colleges and universities for its residents to attend at a reduced cost. These institutions are supported primarily by funds from the state and federal government. Students who are not residents of the state (this includes international students) may still attend the school, but must pay more. This is called "out-of-state tuition."

Private Schools

Each state in the United States also has colleges and universities which were established by private organizations and religious groups. These institutions are supported primarily by student fees, gifts, and the income from their endowments. Private schools are generally more expensive than public schools, as they do not receive direct support from government sources.

Coeducational Schools

"Coed" schools are those at which both men and women attend classes together. They may be private or public.

Denominational Schools

There are many schools in the United States which are affiliated with and supported by a religious denomination. Such schools are privately owned and may or may not be coeducational. In most cases, students do not have to belong to the denomination in order to attend the institution.

ACCREDITATION

In a country with no centralized authority for educational matters, accreditation is used to verify the quality of an educa-

tional institution. Accreditation covers areas such as admission and graduation requirements, curriculum (course offerings, faculty, textbooks, homework requirements, and examination policies), academic facilities (libraries and laboratories), and transfer credit policies.

Because United States' institutions vary widely in the quality of their programs, it is essential that students check the accreditation of an institution before they enroll. In fact, to enroll in a non-accredited program could be a waste of your time and money (an exception might be for new institutions which are still waiting to be accredited).

The United States has six regional accreditation commissions. Below, students will find the address of each commission, along with the names of the states they cover. Students are advised to write these commmissions for lists of accredited schools. Information may also be obtained directly from the college or university itself, or the American Council on Education (One Dupont Circle, Washington, DC 20036 USA).

ACADEMIC CREDITS AND AUDITS

Most colleges require students to complete a certain number of credits before awarding a degree. A credit reflects the content and difficulty of the course, as well as the number of hours a course meets in one week. For example, a history course which meets for one hour at a time, three times a week may be worth three credits. A full-time student takes 15 to 18 credit hours at a time, or roughly four to six courses. To take more or less requires special permission. At this pace, a student needs four years to complete a bachelor's degree and two years to complete an associate degree. Students may, however, complete their undergraduate work in a shorter period of time if they take more than the normal number of courses or go to school during the summer months.

It is not necessary to complete work at a community or junior college in two years, nor must work toward a bachelor's degree be finished in four years. Students may extend this time by taking fewer courses each semester. International students must, however, take at least twelve credits each term as an undergraduate or nine credits as a graduate student to be considered a full-time student by the Immigration and Naturalization Service and to be entitled to remain in the United States.

Students may choose to audit a course. When such a choice is made, the student attends class, but is not required to take any course examinations, or to write any papers. The student does not receive a grade, nor any academic credits. Instead, the institution will mark "audit" on the student's academic record to indicate some work in the course has been undertaken. This is an excellent way to strengthen one's academic background, and practice one's English.

GRADING SYSTEMS

There are several types of grading systems used by educational institutions to evaluate a student's performance. Two commonly used systems are letter grades and percentage grades.

Letter Grade	Percentage	Meaning
A	90 to 100	Excellent
B	80 to 89	Good
C	70 to 79	Average
D	60 to 69	Below Average
F	below 60	Failing
I		Incomplete

GRADE POINT AVERAGE

Most institutions will compute a grade point average (or G.P.A.) by assigning four points to every A, three points to every B, two points to every C and 1 point to every D (no points are given for failing grades). The number is then multiplied by the

number of credits represented by that grade. The total points are divided by the total number of credits. The example below uses courses which would typically be taken by first year college student.

Course	Credits	Grade	Points
Literature	3	C	6
Chemistry	4	B	12
Mathematics	4	A	16
Psychology	3	B	9
Economics	3	A	12
	17		55

55/17 = 3.23 Grade Point Average (GPA)

ACADEMIC PROBATION

Most institutions have academic standards which students must meet to remain in good standing. These standards are published in the schools' catalogs, and warning notices are issued to those who are below the minimum standards. Standards are usually based on overall grade point averages, as well as specific course grades.

A letter notifying students of academic probation generally tells them what they must do to regain their good standing. For example, a student may be given a time limit in which to achieve a higher GPA or to retake failed courses.

If a student continues to earn poor grades, he or she may be dismissed from school (suspended). Some schools allow students to apply for readmission at a later date.

Most schools permit students to appeal their suspension. For example, the decision may be reversed in the case of a serious medical problem or family emergency.

TUTORS

Many institutions have tutorial services. Students who take advantage of this opportunity, receive academic assistance from other students or from teachers in addition to regular class hours. In some cases, the student is required to pay a fee for these services, but in most instances, the services are free.

If a student is having academic difficulty, he or she should get assistance immediately. The student activities office, international student advisor, or academic advisor can provide more information.

ACADEMIC CALENDAR

The academic year is approximately nine months long, and may be divided in a number of ways, depending upon the individual institution. There are three basic types of academic periods — semester, trimester, and quarter.

Semesters are between 14 and 16 weeks in length. There are two semesters in an academic year. The first begins in August or September. The second one ends in May or June. A variation of the semester plan is the 4-1-4 plan. The numbers simply denote that there is a one month period in between two four month semesters. That one month is often used for independent study or special projects.

Trimesters are 10 to 12 weeks in length. There are three trimesters in an academic year. The first begins in August or September. The last one ends in May or June.

Quarters are also between 10 and 12 weeks in length. However, there are four quarters in an academic year. They run from September to the following September. Students complete one year of study by taking courses during any three of the four quarters. Students may speed up their program of study by taking courses during all four quarters.

Although students may start taking courses at the beginning of any semester, trimester, or quarter, most U.S. students begin school during the fall term. For this reason, the fall term is the only time many introductory courses are offered, housing is available, and orientation programs are held.

SUMMER SESSIONS

Many college-level academic institutions offer classes during the summer. Classes meet more frequently or for longer periods so a semester's work takes from five to six weeks. Students are usually limited to no more than two courses per summer session because of the intensity of study.

Attending summer sessions is an excellent way for students to shorten their time of study in the United States. New students are frequently advised to attend an English language orientation program before the start of their first official semester.

ADVANCED STANDING

Certain United States colleges and universities will grant college credit for "college level" courses taken during high school (or its equivalent). This is called "advanced standing." If students feel their previous course work is equivalent to college work, they should ask schools whether credit may be granted. Advanced standing shortens the time it takes to complete a degree.

TRANSFER OF CREDIT

Most schools also grant college credit for courses taken at other colleges or universities (either in the United States or in another country). This is known as a transfer of credit.

Colleges are not always able to inform international students how many credits they will receive for a course taken elsewhere until the student actually registers. A transfer of credit can be a serious and time-consuming job, and most colleges are reluctant to do such a transfer until a student has applied and has been accepted. Institutions may complete the transfer of credit before a student applies, or give the student an unofficial opinion, but remember, the college is not bound by an unofficial opinion.

In general, colleges will give credit for any course taken at an accredited institution, provided the student received a grade of C or better. These requirements present problems when students request credit for courses taken outside the United States. First, most non-U.S. schools are not subject to U.S. accreditation. Therefore, the decision whether to give credit for work done at a foreign institution is more difficult. If possible, students should provide a description in English of the course taken. By reading the course description, the U.S. college official will be able to make a judgment on the number of credits to be transfered. When possible, school officials will consult with

any of their own faculty members who might have attended the foreign institution.

A second problem arises since most schools outside the United States do not use the U.S. grading system. To determine equivalent grades, U.S. officials must rely on reference books such as the **World Education Series,** produced by the American Association of Collegiate Registrars and Admissions Officers (AACRAO). These books describe the educational systems and grading systems used in many countries. For additional information on the publications in this series, write to Executive Secretary, AACRAO, One Dupont Circle, Suite 330, Washington, DC 20036, U.S.A. Another option used by U.S. officials is to transfer courses as a "C" for "credit" (not the letter grade), and not use the course in computing gradepoints.

Finally, the amount of credit transferred will depend upon the subject matter of students' previous coursework. For example, students should not expect to get much credit for three years of liberal arts studies, if they now apply as engineering majors. This is because the engineering curriculum is very structured and requires few liberal arts courses for graduation.

Once an official transfer of credit has been made, students should make sure a signed copy of the transfer sheet is placed in their college record, and is noted on their American transcript. Students should also retain a copy for themselves.

CHAPTER 2
Selecting A College

SELF ASSESSMENT

College-level study in the United States is very serious and demanding for anyone, but especially so for international students who come without family and cultural support. Therefore, before a student selects a specific institution at which to study, it is wise to conduct a brief self-assessment.

A student should begin by asking the following five types of questions:

1. Why do I want to study in the United States? Is the program I want not available in my own country? Am I truly committed to education or am I trying to avoid an unpleasant home situation?

2. What do I want to study? Is my academic preparation appropriate? Am I studying something that will be relevant to my country's needs? What will my degree be worth when I return home?

3. How well prepared am I? Have I completed the equivalent of a high school education? How do I compare to other students from my own country? Am I above average? What are my strongest and weakest subjects? How proficient am I in English?

4. What is my financial status? Will I be able to support myself if I am not given permission to work while in the United States?

5. Am I mature enough to live in a different culture? Do I understand that there is no single "correct" lifestyle? How will I cope with different customs, food, clothing, and climate? Am I ready to be treated as a "foreigner?"

If, after asking all of these questions a student still wants to pursue an education in the United States, it is time to select 10 to 12 schools to which to apply.

NARROWING THE CHOICES

There are over 3000 colleges and universities in the United States. Deciding which one to attend is not easy for anyone, but the decision is especially difficult for international students unfamiliar with the United States. The following discussion will provide some guidelines to help students narrow their choice from 3000 to a more manageable number. In this section the student will be asked to think about potential fields of study, location preferences (geographic, climatic, and demographic), desirable school characteristics (school size and student body composition), and the importance of international student support services. Finally, the student will have to re-examine his or her personal qualifications.

POSSIBLE FIELDS OF STUDY IN THE U.S.A.

The following list illustrates the many fields of study (majors) available to students in United States colleges and universities. Not every school offers every major. Unless students know exactly what they want to study, they should select a school that offers a wide variety of subjects (including art history, business, communications, computer science, fine arts, history, literature, natural sciences, mathematics, physical sciences, and social sciences). There are two ways to find out which schools offer what majors. The best way is to obtain a copy of the **Index of Majors**, published by the College Board ($11.95, from C43, Box 886, New York, NY 10101, USA). This publication will list the complete offerings of every school in the United States. A second way is to request course catalogs directly from schools.

Agriculture
(Includes Agriculture, Agricultural Economics, Agronomy, Field Crops, Animal Science, Dairy Science, Farming, Ranching, Fish and Game, Wildlife Management, Food Science, Horticulture, Landscaping, and Soil Sciences)

Architecture and Environmental Design
(Includes Architecture and Environmental Design, City Planning, and Urban Development)

Art
Art (general)
Art History, Studio Art, Museum Work
Commercial Art, Graphic Arts, Printing
Fashion Design, Interior Design, Decorating
Photography

Biological Sciences
Biological Sciences (general)
Bacteriology
Biochemistry/Biophysics
Biology
Botany
Ecology
Marine Biology
Physiology
Zoology

Business and Commerce
Business and Commerce (general)
Accounting
Advertising, Marketing
Business Management and Administration, Industrial Management
Finance and Banking
Hotel and Restaurant Administration
Personnel Work
Real Estate
Sales and Retailing
Transportation and Commerce
Secretarial Studies, Court Reporting

Communications
(Includes Communications, Film, Journalism, Radio and Television)

Computer Science and Systems Analysis
(Includes Computer Science, Data Processing, and Systems Analysis)

Education
Education (general)
Child Development and Nursery Education
College Teaching
Educational Administration, Guidance, Counseling
Elementary Education
Education of Exceptional Children, Education of Mentally Retarded
Health Education, Physical Education, Recreation
Industrial Arts, Vocational Trade and Industrial Education
Secondary Education
Speech Therapy, Education of the Deaf
Other (Agricultural, Art, Business, General Education, Home Economics, and Music Education)

Engineering
Engineering (general)
Aerospace and Aeronautical
Architectural
Chemical, Petroleum
Civil, Construction and Transportation
Electrical
Engineering Design
Engineering Sciences
Industrial Management
Mechanical
Naval Architecture and Marine Engineering
Other (Agricultural, Mining and Mineral, Nuclear, and Textile Engineering)
Technologies (Air Conditioning, Drafting, Engineering Aide, Industrial Lab Technology, Instrumentation Technology, Plastics Technology, Quality Control, Surveying)

English and Literature
(Includes Creative Writing, English, Literature, Speech)

Ethnic Studies
(Includes American Studies, Black Studies, Spanish-American Studies)

Foreign Languages
Foreign Languages (general)
Classical Languages
Linguistics
Modern Languages Interpreting, Translating (Eastern, French, German, Italian, Russian, and Spanish)

Forestry and Conservation

Geography

Health and Medical Professions
Health and Medical (general)
Dental Assisting, Dental Hygiene, Dental Technology
Laboratory Technology, Radiology and X-ray Technology
Medical Assisting, Medical Records Librarian, Medical Technology, Health and Safety
Nursing, Practical and Registered
Optometry
Pharmacy
Premedicine, Predentistry, Preveterinary Medicine
Physical Therapy, Occupational Therapy

History and Cultures
(Includes African, American, Classics, European, Far Eastern, and Russian)

Home Economics
(Includes Clothing and Textiles, Family Relations, Food and Nutrition, Child Care, Institution Management)

Library Science

Mathematics and Statistics

Military Science
(Includes Air Science, Merchant Marine, Military Science—Army, Naval Science)

Music
(Includes Composition and Theory, Instrumental, Music History, Voice)

Philosophy and Religion
(Includes Ministry, Philosophy, Religion, Theology)

Physical Sciences
Physical Sciences (general)
Astronomy
Chemistry
Earth Science, Geology
Meteorology
Oceanography
Physics, Physical Sciences

Psychology
(Includes Child Psychology, Experimental Psychology, General Psychology, Social Psychology)

Social Sciences
Social Sciences (general)
Anthropology
Correction Administration, Fire Science, Police Science, Law Enforcement
Economics
Industrial Relations
International Relations, Foreign Service
Political Science, Public Administration, Government Service, Politics
Prelaw
Sociology, Social Work

Theater Arts
(Includes Acting, Dance, Drama, Theater Arts)

Trade and Vocational
(Includes Airline Hosting, Automotive Maintenance, Aviation Maintenance, Building Construction, Carpentry, Cosmetology, Mortuary Service)

LOCATION

The United States is the fourth largest nation in the world. In fact, a single one of its states may be larger than many countries. One of the most important criteria used to select a school is an individual's preference for a particular part of the United States. There are three aspects of "location" to consider—geographic conditions, climate, and demographics (urban or rural.)

MAJOR GEOGRAPHIC REGIONS OF THE UNITED STATES

Map A provides a breakdown of the United States into States. It indicates state capitals, as well as major cities. Map B outlines the seven main geographic regions of the United States (excluding Alaska and Hawaii). There are many topographical differences between these regions. Map C indicates whether an area is dominated by mountains, plains, or deserts.

CLIMATE IN THE UNITED STATES

Climate also varies considerably from one region to another. Maps D and E indicate average temperatures throughout the United States during the months of January (winter) and July (summer). Students should still investigate the weather patterns more closely, once they have narrowed their selection of schools. Weather affects clothing needs and lifestyle, particularly recreational activities. An excellent guide to living conditions across the United States is **The Places Rated Almanac—Your Guide to Finding the Best Places to Live in America** ($14.95 from Rand McNally & Co., New York, NY, USA).

Coldest Cities. Some cities in the United States have freezing temperatures (below 32 F or 0 C) for nearly half the year. They include Anchorage, Alaska; Bismark, North Dakota; Duluth, Minnesota; Fargo, North Dakota; Minneapolis-St. Paul, Minnesota; and Waterloo, Iowa.

Warmest Cities. Other cities have temperatures that exceed ninety degrees for one-quarter of the year. They include Austin, Texas; Fort Myers, Florida; Las Vegas, Nevada; Mobile, Alabama; Phoenix, Arizona; San Antonio, Texas; Shreveport, Louisiana.

Sunniest Cities. There are some cities in the United States where the sun almost always shines. They include Bakersfield, Chico, Fresno, Sacramento, and Santa Barbara (all in California); El Paso, Texas; Las Vegas, Nevada; and Phoenix, Arizona.

Rainiest Cities. There are also cities in the United States that have some kind of precipitation (rain or snow) on nearly half the days of the year. They include Akron, Ohio; Buffalo, New York; Cleveland, Ohio; Pittsburgh, Pennsylvania; Portland, Oregon; and Seattle, Washington.

The weather patterns described below are intended to supplement the maps and give the student a climatic overview, but remember that even within a single state weather conditions can vary significantly. Students who have never lived in a cold climate, or who dislike cold weather might not want to choose a university in an area where snow and ice cover the ground for three months of the year.

New England and Northern Midland States. These two regions have the most extreme climate conditions. In New England, fall, winter, spring, and summer are very distinct seasons. In the northern midland states, winter and summer dominate, although there is a short fall and spring. Fall (or autumn) in both regions is generally pleasant. During September and October there is moderate rainfall and the temperature gradually changes from warm to chilly. The countryside is beautiful as the leaves change in color from the green of summer to the red and orange of fall. The beginning of November is sometimes mild but by the end of the month, all of the leaves are gone and temperatures are quite low. December through mid-March brings the most severe weather conditions. Cold temperatures, snow, and wind are prevalent. Activity is somewhat slowed, and often confined to the indoors, although ice skating and skiing are popular activities. Days become short (sundown is as early as 4:30 in the afternoon). Some areas close down for days at a time during and after heavy snowfalls (roads closed, no deliveries, stores closed, and so on).

A warming trend starts during the last half of March and continues until May (the end of most semesters). There is usually a fair amount of rainfall. Trees form new leaves and flowers bloom.

From May through August the temperature goes from warm to hot—sometimes rising to the higher nineties. The rainfall decreases, days are long (sundown is as late as 9:30) and there is ample opportunity to enjoy water sports, outdoor dining (called picnics), and other outdoor activities.

Middle States. The weather patterns of the Middle States are very similar to the New England and Northern Midland States, however, the winter is generally warmer and the summer cooler. In the winter, there is more rain than snow. In the summer, the air is generally humid.

Southern and Southwestern States. The Southern and Southwestern States get little (if any) snow. Winter temperatures are mild, while the late spring, summer, and early fall are dominated by heat. In the Southeast, heat is accompanied by extreme humidity. There is usually a moderate amount of rainfall, but sometimes dry periods (especially in the Southwest) last for weeks at a time.

Pacific States. The Pacific States represent the mildest region, primarily because of the effects of the Japan current, which flows down the western coast of the United States. The states of Washington and Oregon have quite a bit of rain. Northern California experiences moderate temperatures throughout the year. Southern California is much warmer.

DEMOGRAPHIC CONDITIONS

A student must also decide whether to go to school in a big city, or in the countryside. There are advantages and disadvantages to each. Compared to small towns, big cities are usually more ethnically diverse. They have better public transportation systems (subways or trains which run underground and buses

which run above ground). There is greater variety in cultural activity — theater, lectures, museums, concerts (classical music, as well as contemporary). In general, there is more choice and variety in everything — food supplies, clothes stores, shopping districts, movie theaters, restaurants. Big cities also have their disadvantages. Again compared to small towns, the cost of living is much higher. The crime rate is much higher. They are more crowded. They are dirtier. There is less sense of community. And day-to-day living is not as relaxed.

An average of 64 people live in each square mile (or 25 people per square kilometer) of the United States. These people are not, however, evenly distributed across the country. Some areas are very densely populated (256+ people per square mile, 100+ per square kilometer), while others are practically barren (less than 26 people per square mile, 10 people per square kilometer). Map F illustrates how the population of the United States is scattered.

Nearly three-quarters of the total population lives in cities or areas that surround cities. These are called metropolitan or urban areas. The largest cities in the United States (in alphabetical order) are as follows:

Atlanta, Georgia
Baltimore, Maryland
Boston, Massachusetts
Chicago, Illinois
Cleveland, Ohio
Columbus, Ohio
Dallas, Texas
Denver, Colorado
Detroit, Michigan
Houston, Texas
Indianapolis, Indiana
Jacksonville, Florida
Los Angeles, California
Memphis, Tennessee
Miami, Florida
Milwaukee, Wisconsin
New Orleans, Louisiana
New York, New York
Philadelphia, Pennsylvania
Pittsburgh, Pennsylvania
Phoenix, Arizona
St. Louis, Missouri
San Antonio, Texas
San Diego, California
San Francisco, California
San Jose, California
Seattle, Washington
Washington, DC

SCHOOL CHARACTERISTICS

Once a student has decided where in the United States to attend school, he or she must decide what school characteristics are important — in terms of size and student body composition.

Size. A student must choose among two-year colleges, large institutions, or small institutions. Here are some of the advantages and disadvantages of each.

Two-year colleges are generally developed to serve the needs of a specific community. This means they are publicly supported and the cost to students is minimal. English as a Second Language programs (discussed later in this section) are common. However, since most students live nearby, residence halls are rare. Also, special facilities such as libraries and sports complexes are limited.

A large institution, such as a university, may provide a greater variety of courses, academic facilities, social events, extracurricular activities, and international student support services. It may have better athletic teams, a larger library, a better museum, and more technologically advanced scientific equipment. But it can also be highly impersonal in the way it processes students, especially through their first academic years.

A smaller school, such as a four-year college, may provide the student with more frequent contact with faculty members, a greater chance to participate in school activities — varsity athletics, theatrical productions, choral events, and the opportunity to make friends with nearly everyone in the graduating class. In addition, classrooms generally contain fewer students, and administrative chores involve far less time. At small schools, however, students will usually find fewer courses (and majors) from which to choose, less advanced laboratory facilities, and less in the way of international student support.

As a student considers the differences between these different types of institutions, he or she should keep in mind that the advantages of one, often become the disadvantages of the other.

Housing. Students should also think about what kind of housing they would like in the United States. Would they prefer to live on campus (the land occupied by the school buildings is known as a "campus") or off campus? Different schools have different housing options. They include single-sex dormitories, coeducational dormitories, married student housing, school-owned apartments, language houses, and international student houses. Some schools provide enough housing for all their students. Others have places for only few students. And still others have no housing at all. They are called "commuter campuses" where all students live off campus and "commute" to school on a daily basis.

A *dormitory* is a multi-story building with many rooms on each floor. Single-sex dormitories are those which are lived in by just men or just women. Coeducational dormitories are those which contain members of both sexes. Some have men and women living on the same floor, others have men or women living on alternate floors. Men and women are not assigned to live in the same room.

The number of students assigned to live together varies. Usually, there are one to three students per room, with community bathrooms located in a hallway which connects many rooms. A "single" means one student per room; a "double" means two people per room; a "triple" means three people per room. A "suite" means the space is divided into many rooms, usually a common living area, one or two bathrooms, many bedrooms, and sometimes a kitchen. Suites are used to accommodate as many as ten people.

Married student housing, and *college owned apartments* are recommended for students with dependents. Married students and children are generally not allowed to live in dormitories.

Students also have the option to live off-campus. If this is the case, students should contact the housing office immediately after accepting an offer of admission to request assistance in finding a place to live. Good, inexpensive, housing near a college or university is often scarce.

Some institutions have *language houses* or an *international house,* where international students may live. Language houses are dormitories which are populated primarily by people of the same culture, or by Americans who wish to become more fluent in a particular language. An international house is a dormitory populated primarily by international students. There are arguments for and against either of these arrangements. On one hand, cultural adjustment might be made easier. On the other hand, the atmosphere may hinder some students from learning English or adapting to American culture.

Student Body Composition. Does it matter whether a school is coeducational or single sex? What about religious affiliation? Is a high international enrollment important?

According to the most recent survey by the Institute of International Education, the following schools have the largest international student enrollments.

Name of Institution	Location	Int'l Students
Miami Dade Community College	Miami, FL	4316
Univ. of Southern California	Los Angeles, CA	3761
Univ. of Texas	Austin, TX	3286
Univ. of Wisconsin	Madison, WI	2901
Columbia Univ.	New York, NY	2773
Ohio State Univ.	Columbus OH	2606
North Texas State Univ.	Denton, TX	2570
Southern Illinois Univ.	Carbondale, IL	2565
Boston Univ.	Boston, MA	2462
Univ. of Houston	Houston, TX	2424
Univ. of Michigan	Ann Arbor, MI	2366
Univ. of Minnesota	Minneapolis, MN	2344
George Washington Univ.	Washington, DC	2221
Texas Southern Univ.	Houston, TX	2154
New York Univ.	New York, NY	2115
Louisiana State Univ.	Baton Rouge, LA	2109
Harvard Univ.	Cambridge, MA	2056
Indiana Univ.	Bloomington, IN	2026
Univ. of California	Los Angeles, CA	2012
Iowa State Univ.	Ames, IA	2008

According to the Institute of International Education, the following schools have the largest proportion of international students.

Name of Institution	Location	Percentage
Northrop University	Inglewood, CA	55.7
Univ. of San Francisco	San Francisco, CA	24.8
Massachusetts Inst. of Technology	Cambridge, MA	22.9
George Washington Univ.	Washington DC	18.6
American Univ.	Washington DC	18.1
Texas Southern Univ.	Houston, TX	18.1
Univ. of Miami	Miami, FL	18.1
Howard Univ.	Washington DC	17.5
Southern Univ. A & M	Baton Rouge, LA	13.3
Stanford Univ.	Stanford, CA	13.0
Univ. of Southern California	Los Angeles, CA	12.8
Univ. of Southwestern Louisiana	Lafayette, LA	12.7
Harvard Univ.	Cambridge, MA	12.3
Southern Illinois Univ.	Carbondale, IL	11.1
North Texas State Univ.	Denton, TX	11.0
Columbia Univ.	New York, NY	10.9
Boston Univ.	Boston, MA	10.7
Univ. of Pennsylvania	Philadelphia, PA	10.7
Miami-Dade Community College	Miami, FL	10.5
Ohio Univ.	Athens, OH	10.0

INTERNATIONAL STUDENT SERVICES

The most important services to check for are the availability of an international student advisor and an international student orientation program. Some students might be interested in programs for dependents, and community support services. Others might want to check for English as a Second Language Programs or intensive English learning centers.

INTERNATIONAL STUDENT ADVISOR

Almost all colleges and universities with international students have at least one person designated as an international student advisor. This person helps international students adjust to cultural, academic, and social differences which may confront them upon their arrival in the United States. The advisor can also answer questions about visas, financial assistance, and student employment. Finally, the advisor will provide information on U.S. government requirements and regulations specific to the international community. The international student advisor should not, however, be confused with the academic advisor. In other words, the international student advisor will generally not advise the student as to course selection, and programs of study.

INTERNATIONAL STUDENT ORIENTATION

Many colleges and universities have general orientation programs before the start of the fall semester. Quite often they will also have a special orientation for international students. This is a good time for students to meet the international student advisor, as well as each other. During orientation, students learn much about the institution, its academic policies, its available facilities, and its course offerings. They often meet with their academic advisor to discuss a program of study. Finally, they will often be taken on tours of the surrounding community.

ENGLISH AS A SECOND LANGUAGE PROGRAM AND INTENSIVE ENGLISH CENTERS

Both of these programs are designed primarily to assist international students in improving their written and spoken English. They help prepare students for study in U.S. institutions. Many schools will accept students who are not fluent in English, with the provision that they complete an English as a Second Language program before they are permitted to enroll in other courses.

PERSONAL QUALIFICATIONS

Finally, a student must consider how well his or her personal qualifications match up with those of other applicants to an institution. In doing a self evaluation, students should compare their standardized test scores from the Test of English as a Second Language (TOEFL) and the Scholastic Aptitude Test (SAT) (both of these will be discussed in Chapter 4), previous grade point average, and class standing to those published as "average" in the school's catalogue. Students should make sure to apply to at least two places where their credentials place them above the school's average.

Students are now ready to fill out Worksheet I. They should answer the questions as they apply to their individual qualifications and interests. The "sample answers" should only be used as a guide.

Worksheet I
Choosing A College

Category	Sample Response 1	Sample Response 2	Student Response
Field of Study	engineering	undecided	
Geographic Preference	ocean	mountains	
Climate	sunny, warm	snowy, cool	
Demographic Preference	large city, diverse population	medium-small city	
Size of School	more than 5000 students	1000–3000 students	
Housing Options	international house	coed dormitories	
Student Body Composition	coed, many international students	coed, Catholic	
International Student Services	advisors	advisors	
Orientation	very important	somewhat important	
ESL	not important	very important	
TOEFL Score	600	430	
Class Standing	top 10%	top 20%	

CHAPTER 3
The Inquiry Process

OBTAINING INFORMATION

After students read Chapter 2 and complete Worksheet I they need to find the schools that best fit their needs.

First, students should review Parts VI and VII of this book. Part VI lists attendance costs, religious affiliation, admissions requirements, international student acceptance rates, financial aid possibilities, international student population data, housing options, English as a second language programs, and special orientation programs. Part VII gives additional data on international student enrollments. It describes each school's curriculum focus, academic options, special facilities, and international student scholarships.

Second, students should contact (and if possible, visit) the nearest Binational Center or Overseas Counseling Center. At these agencies, students will find many reference books on U.S. colleges and universities. The books will provide more detailed information on study programs, degree offerings, application procedures, attendance costs, and curriculum. The addresses for all Binational Centers may be found in Appendix 2. A list of Overseas Counseling Centers is available in a booklet entitled **Entering Higher Education in the United States: A Guide for Students of Other Countries,** published by the College Entrance Examination Board (870 Seventh Avenue, New York, NY 10019, USA).

Third, students should ask questions of their teachers and friends who have been in the United States.

After students have narrowed their choice to 10 to 12 colleges or universities, they should write to these schools directly and request a catalogue or bulletin. These will give detailed information about the institution. At the same time, students should request the application form and information about housing, English language requirements, and entrance requirements.

Some additional questions students might ask when they write to individual schools are as follows:

Are the financial rates for international students different from those for United States students? Is financial assistance offered to international students? If so, how much? When should students apply for it? How is application made?

What are the English language requirements of the school for entering international students? Are results from the Test of English as a Foreign Language (TOEFL) or American Language Institute of Georgetown University (ALIGU) required before acceptance? What are the minimum acceptance scores? Does the school or university offer an English language program for international students? If so, what does it cost? How long does it last? Does the student receive college credit for the courses? May the international student take courses in addition to the English language courses?

Most institutions will forward this information free of charge; however, some may request a fee of one or two dollars for the catalog. In order to save time, you should always send your request air mail if you are outside of the United States. Your request should include the following information:

- Full name, age, marital status, and mailing address.
- Education to date (secondary schools and universities). Include the location of the school, subjects studied, and dates of attendance. Also indicate what marks were received.
- Total amount of money (in U.S. dollars) which will be available to contribute to education each year. Also indicate the source of this financial support.
- What course of study is planned.

Schools will respond to a student's request in one of three ways:

1. Send the student final application materials.
2. Request the student provide additional information.
3. Discourage the student from continued application.

Because the mail often moves slowly, students should begin their correspondence at least one year before they plan to start college. Most schools have their catalogs and application materials printed one year before the fall term begins. In other words, applications for admission to the term beginning September, 1988 are ready in September 1987. Schools will send their catalogs by surface mail, which can take months to reach a location abroad. When students start the actual application process, they may request that colleges respond via air mail. If possible, send colleges international air postage (which can be purchased in local post offices) to use for the material they mail overseas.

Most colleges have special instructions pertaining to international students. Letters which explain these policies are often forwarded with the catalog and application form and other material. Read the literature carefully, and follow the instructions precisely.

After receiving the catalog or bulletin, students should check again to see if the school meets their selection criteria, and whether they have the proper background to be admitted. The catalog will have a section on curriculum and entrance requirements that will provide students with this information.

CHAPTER 4
Application Process

There are many parts to the final application process. Students may expect to do any or all of the following:

- *Complete an application form,* including an autobiographical statement.
- *Pay an application fee.* In countries with a currency restriction in effect, this fee (generally between $10 and $40 U.S. dollars) may sometimes be waived.
- *Provide English translations of all previous academic work* (a detailed list of subjects studied, and examination results). This record is known as a "transcript".
- *Provide letters of recommendation* from current teachers or employers. Schools generally provide forms for these letters when they send the application. The "recommender" is usually asked to discuss the applicant's strengths and weaknesses, and whether the applicant is a good candidate for further education.
- *Demonstrate English language proficiency.* This is usually accomplished by submitting satisfactory test results from the Test of English as a Foreign Language (TOEFL).
- *Submit results from other standardized tests.* In some cases, United States colleges will require applicants to take the Scholastic Aptitude Test (SAT) or American College Test (ACT).
- *Submit detailed financial information.* Colleges usually require students to fill out the College Scholarship Service's "Declaration and Certification of Finances" (or its equivalent).
- *Provide a certification of health.*

THE APPLICATION FORM

Almost every college and university has its own application form. Most, however, ask for the same basic information: full name, mailing address, permanent address (if different from mailing address), semester in which student plans to begin study, intended field of study, country of citizenship, family background, academic preparation, community or scholastic awards, future goals, and past employment history. Some colleges will ask for more information, such as an autobiographical essay. Others will ask for less. International students will find helpful suggestions in **Do It—Write: How to Prepare A Great Application** (written by Gary Ripple, Director of Admissions at The College of William and Mary in Virginia). The book is available for $3.75 from Octameron Press, PO Box 3437, Alexandria, VA 22302, USA.

Most schools have different application forms for graduate and undergraduate study. Students should be careful to request the proper form.

Students should also be careful to complete the entire application form. An incomplete form may be returned, students may lose their application fee, and most importantly, they may not be admitted because of this lack of information or suggestion of carelessness. If students must leave a question unanswered on their application form, they should attach a note which explains the reason. This may save them from having the application returned.

Information submitted should be truthful. Many schools will deny students admission on the basis of academic dishonesty. Ignorance or oversight is not always considered a valid excuse. Students must be careful and answer all questions to the best of their knowledge.

TESTS

SAT and ACT. Some institutions require international students to take the Scholastic Aptitude Test (SAT) or the American College Test (ACT) and possibly one or more Achievement Tests before an admission decision is made.

The SAT is a multiple choice test given several times a year. It lasts approximately three hours and measures mathematical and verbal skills. Students may take the test more than once. Most schools will take only the highest score. SAT scores run from a minimum of 200 to a maximum of 800 for each of the two sections. Schools do not usually specify a minimum acceptable score, but will often indicate a general range of scores as they are used in the admission decision.

For comparison purposes, note that the average national SAT score for United States students is 470 on the mathematics section and 430 on the verbal section.

The ACT is somewhat different in subject matter, as it covers social studies and sciences as well as mathematics and verbal skills. ACT scores range from 1 to 36. The average score for United States students is 18 in mathematics and 18 in verbal skill.

For further information, (including sample test questions) on the SAT, write to the College Entrance Examination Board, Box 592, Princeton, NJ 08540, USA or Box 1025, Berkeley, CA 94001, USA. Request the SAT Bulletin of Information. For information (and sample test questions) on the ACT, write to ACT, P.O. Box 451, Iowa City, Iowa 52240, USA.

Achievement Tests. These are different from the SAT or ACT in that each test covers only one subject area. Furthermore, they measure both the student's knowledge of that area and his or her ability to apply that knowledge. The tests last two hours and forty minutes. Like the SAT, scores range from 200 to 800. Students may take Achievement Tests in the following subjects:

American history	Biology
Social studies	Chemistry
European history and world cultures	Physics
	Mathematics
English composition	Hebrew
French	Latin
German	Spanish
Russian	Literature

If an institution asks that international students take Achievement Tests, students should find out how many tests are required (generally two or three), and what subjects must be covered (generally English, mathematics, and one of the student's choosing).

TRANSCRIPTS AND OTHER OFFICIAL DOCUMENTS

Students should contact schools which they have previously attended and ask that an official copy of their transcript be sent to each U.S. school to which they have applied. Official copies are those sent directly by one school to another. They are signed by a school official and stamped with an official school seal.

Most schools require an official transcript, although some will accept properly authenticated student copies. Properly authenticated means a transcript must bear the signature of a school official, a notary public, or an official at the American consulate. If students are unable to submit official transcripts, they should forward unofficial copies with a letter explaining why official copies cannot be sent.

If students have only one official transcript and wish to retain it, they may take one of three actions.

1. Send the original and ask the receiving institution to make a copy for its records and return the original.

2. Have a recognized institution such as the American embassy notarize a copy of the original and forward the copy to the institution.

3. Have a recognized educational institution, such as AMIDEAST, translate the transcript and send the official translation to the school. (See Appendix 3 for location of AMIDEAST field offices.)

Students should check with the institution to be certain the chosen option is acceptable.

Every transcript should include:

- A list of subjects studied
- The grades received in those subjects
- The student's academic standing in relation to other students (if known)
- A description of the grading system which shows whether a grade is excellent, good, passing, failing, and so on. (If this is not included in the transcript, most United States schools have reference books which make the conversion)

Students should keep checking with their previous schools to make sure their records have been forwarded. Occasionally, schools do not send the records, or the records get lost or delayed in the mail. Do not hesitate to request that another set of records be sent. Send all correspondence to the United States via air mail and make sure the proper "zip code" (a five-digit number that follows the name of the state) is included on all envelopes. This zip code is part of the address and is found in the literature from the college.

ENGLISH PROFICIENCY REQUIREMENTS

International students are normally required to demonstrate their proficiency in English before United States colleges and universities will accept them.

Two tests are widely used by academic institutions to determine the level of English proficiency: the Test of English as a Foreign Language (TOEFL) and the American Language Institute of Georgetown University (ALIGU) test.

TOEFL. The TOEFL is the most widely recognized test of English proficiency. It is required of international students by more than 2500 colleges and universities. The TOEFL is offered every month under one of two programs. The International Testing Program gives the exam on six Saturdays throughout the year. The Special Center Testing Program gives the exam on six Fridays throughout the year. In 1984, over 398,000 people applied to take TOEFL. The test was given at 1100 test centers in 140 countries around the world. Students should note that the TOEFL office does not determine passing or failing scores. The decision on acceptable scores rests with the individual institution. As language proficiency can change rapidly, students should also be aware that TOEFL scores are only good for two years.

The TOEFL is a timed, three part exam which takes two hours to complete. All questions are multiple choice with four answers from which to choose. The three sections are as follows:

Listening Comprehension. This section measures the student's ability to comprehend spoken American English.

Structure and Written Expression. This section measures a student's familiarity with English sentence structure.

Reading Comprehension and Vocabulary. This section measures a student's ability to define words and understand nontechnical reading material.

Students are advised to register for the test as soon as possible so institutions will receive their TOEFL results before the application deadline. The process is time consuming. Registration for the exam generally takes place seven weeks before the test date. Examination results are mailed approximately one month after the test date. Schools usually require an official copy of test results, sent directly from the TOEFL office. Schools often do not accept student copies.

International Student Identification Service (ISIS). This is a FREE college information service available to students who take the TOEFL. Students who wish to participate in ISIS answer a few questions on the TOEFL registration form about themselves, their academic record, their educational goals, and their financial resources. ISIS then makes this information available to participating colleges and universities. These institutions have the option of sending students more information about academic programs and application procedures. ISIS is an excellent way for students to learn about programs of study well suited to their qualifications and interests.

Students who feel they should not be required to take the TOEFL should send an explanation directly to the institutions to which they plan to apply. They should NOT write to the TOEFL office.

Remember, the TOEFL application is NOT an application for admission to any institution.

Registration forms, a list of test centers, and further information about the TOEFL are available in the TOEFL Bulletin of Information. This bulletin is available at overseas counseling centers, United States embassies, and offices of the United States Information Agency. The bulletin may also be obtained free of charge by writing to TOEFL, Box 899, Princeton, NJ 08540, USA.

The TOEFL Bulletin generally includes the following sections:

- General Information on the TOEFL and ISIS
- How to Register for the TOEFL and ISIS
- What to Bring on the Day of the Test
- How to Request Score Reports
- How to Interpret Score Reports
- Special Requests (Refunds, Score Cancellation, Additional Score Reports, Handicapped Individuals)
- Sample Test and Practice Questions
- Registration Form
- Calendar of Test Dates
- Locations of Test Centers
- Where to Register for TOEFL

ALIGU. The ALIGU test may be given by the American embassy in a particular country, and interested students should contact that agency. However, before taking the ALIGU test, students should determine whether the institution which will receive the results of the test will accept the ALIGU results in place of the TOEFL. Many institutions will take only the TOEFL results.

Michigan Test. Another widely accepted English proficiency test is the test developed by the English Language Institute of the University of Michigan. If the institution to which you are applying accepts this test, you can get further information about it by writing to Testing and Certification, English Language Institute, University of Michigan, North University Building, Ann Arbor, MI 48104, USA.

CHAPTER 5
Post Admission Activities

ADMISSION OR DENIAL DECISION

Once the selected colleges have received all the required information, an admissions committee will review the student's application and make an "admit or deny" decision. There are two types of decision processes used by United States schools: rolling admissions and precipice. Rolling admissions means an admissions decision is made as soon as all the required information (transcripts, test scores, and so forth) is received at the admissions office. Often, the first students to apply have the best chances of gaining admission as there are more places available in the entering class. Precipice means all applications must arrive before an announced date and all candidates are notified of acceptance or rejection on one date (for example, February 15 application deadline, April 15 notification date). No matter which method a school uses, applicants will be informed whether their application was accepted or denied.

Students who are denied admission, usually have the option to appeal the decision. In most cases, however, the deny decision is upheld. Exceptions are made in the case of administrative error, or in cases where substantial additional evidence of academic excellence is presented. Appeals are also successful when a student's past poor academic record is a result of severe illness, or an emotional problem due to the death of a loved one.

Students who are admitted will receive a letter which includes the following information:

- The school to which they have been admitted
- The semester when they may begin studies
- Any special conditions that must be fulfilled such as additional course work or special English language programs
- Housing options

Students will also receive two forms. One is used to accept the offer of admission. The other is used to request campus housing. Students must declare their intention to attend the school and live in on-campus housing by returning both forms and deposits by a specified date. Otherwise, students may lose their place at the institution. Students should return the form by the date specified even if they do not plan to attend. This allows the institution to accept another student for their place, and make plans for class scheduling and dormitory space.

HOUSING

Students who intend to live in residence halls (dormitories) on campus should submit their housing form and deposit as soon as they have decided which institution to attend. The reason for this is that the majority of United States institutions allot housing on a first-come, first-served basis. Those students who apply first and make their deposit will be given first choice of available rooms.

RESIDENCE HALL (DORMITORY) LEASE

After the college has assigned students to a room, it will forward a lease, or contract. Once students sign this lease, they are committed to pay for the room for the alloted time. They are also committed to follow any special rules stated in the lease. For example, cooking of any kind is generally not permitted in dormitories. Some universities offer a lease for one semester only and others offer it for a full year.

Once students return the lease, they are assured of that dormitory space.

Remember, in most instances, schools assign more than one student to each room. These schools realize that "roommates" (those who share a room) do not always get along and in these instances allow students to request a different room. The schools will sometimes even help students find a new roommate.

HEALTH CERTIFICATE AND INSURANCE

Some institutions will send international students a medical history form. This form must be filled out, and brought with the student when he or she arrives at the school. Quite often the student will also be given a brief medical examination upon arrival.

Students are likely to require health care at some point during their college years. As health care in the United States is expensive, international students are encouraged to protect themselves by enrolling in their school's health insurance plan.

FACTORS IN MAKING THE CHOICE OF A COLLEGE

Once students have received notifications of admission, they must decide which school to attend. This decision is not easy, nor is it without consequence. College is a big investment, both financially, and emotionally. A U.S. education will cost tens of thousands of dollars over several years, and will require a lot of hard work.

If students have been admitted to several institutions, they should review their worksheet answers from Chapter 2, and decide which factors are most important. Then, students should carefully examine each school to which they have been accepted, and determine which one will provide the closest "fit." Students might also make further inquiries and ask more questions of school officials. Of course, if students have the opportunity to visit the United States, they should tour the colleges. Visiting campuses and talking to students and school officials are the best ways to make a final decision. Above all, remember the selection of a school is not a science and there are no formulas which will result in the correct decision.

CHAPTER 6
Arriving on Campus

Most institutions have orientation programs designed to familiarize students with the campus, its programs, activities, and registration procedures. International students are advised to attend as many activities as possible. This is a good time for them to meet their academic advisor and the international student advisor, as well as make new friends and learn about the buildings and dormitories on campus.

PLANNING A PROGRAM OF STUDY

Course selection for the first year can be very difficult, especially for students who are unsure which major to choose in college. Schools with "general education requirements" require students to take courses in the humanities, mathematics, social sciences, and natural and physical sciences. Students might, therefore, consider taking a course in each of these areas during their first year. Not only will they begin to satisfy graduation requirements, but they will be able to sample a wide variety of subjects. By the end of this first year, deciding on a major field of concentration will be much easier. Students should read the school's course catalogue carefully and then seek advice from their academic advisor for more precise course selection guidelines.

REGISTRATION

Registration is the process whereby students select their courses, work up a weekly schedule, have it approved by an academic advisor, and finally, pay tuition and fees. Each institution has its own registration procedure. Follow it carefully, and ask questions when in doubt.

Registration can be a hectic process. In a short period of time (generally less than a week), the student must make decisions, fill out forms, and seek out advisors. To make make matters more complicated (and frustrating), some courses will become "full" (in other words, accept no more students) and students who did not get in will have to start the process over. Students should not get discouraged. As they become familiar with the process, it becomes less bewildering. One suggestion regarding "full" courses — quite often if students wait a week and ask again, they will find other students have "dropped" the course, and it's no longer full. Consequently, they can now register. If this does not work, students might want to audit the course instead.

A large number of schools have tried to simplify their registration procedures by having preregistration. Preregistration takes place several weeks before the start of the semester, and is often done through the mail. Complete preregistration materials as soon as possible, as students are often enrolled in courses in the order the forms are submitted.

Class schedules are a key element in the registration package. They provide the student with a list of all courses offered, course numbers, course meeting times (and day) and the instructors' name. Students should read these lists carefully so they do not schedule conflicting classes.

ACADEMIC ADVISORS

Students are assigned an academic advisor to assist them in choosing and scheduling their courses. Students should get their advisor's office phone number, address, and office hours as soon as possible and arrange an interview. Students should be honest with the advisor and follow his or her advice, even if they disagree with an advisor's recommendation. Register for the course, as the advisor is probably correct. Later on, if students find the course is too easy or too repititious, they may return to their advisor, ask permission to drop the course and add another in its place.

If students are dissatisfied with their advisor, or their advisor is never available for consultation, students may request a new advisor be appointed.

After students decide on a major field of study, they will be given an advisor in that field of study.

PROGRAM CHANGES

Students may add and drop courses after the semester has begun. If students realize they are unprepared or overprepared for a class, they should speak to their advisor and arrange for a program change. Usually a program change requires the approval of the students' advisor and instructor as well as completion of a special form. Students should be warned that if they drop a course and do not add one to replace it, they will usually get only a partial refund of their tuition money. After a specified time, they will receive no refund at all. Also, international students must be careful not to drop below the minimum number of credits necessary to maintain their full-time status.

PLACEMENT TESTS

Many colleges and universities require incoming students to take one or more placement tests. These determine the level at which a student should be enrolled. In other words, does the student need to take an introductory course, or can he or she start with an advanced course? These examinations are especially common for science and engineering programs.

Regardless of their performance on the TOEFL, international students should expect to take an English examination to determine whether they need to take any additional English classes.

CHAPTER 7
Employment and Financial Aid

Employment. There are strict regulations concerning the employment of international students in the United States (see Chapter 8). Students should not assume that they will have a salary to assist them in paying their educational expenses. The law does allow students to work on campus, but these jobs are sometimes hard to obtain and they normally do not pay very well ($3.00 to $6.00 per hour).

Fellowships and assistantships. Most schools have a limited number of fellowships or assistantships, and international students usually qualify to fill these positions. These fellowships and assistantships are a means of earning money, however, preference is often given to returning students (those who have completed at least one year of college) or graduate students. Do not depend on being offered one of these jobs.

Grants and loans. International students should also not expect to receive financial aid from the United States government. This money comes from United States tax dollars, and is therefore reserved for United States citizens or permanent residents. If the student has the necessary collateral, private banks in the United States will often extend a personal loan.

Scholarships. Many institutions offer scholarships to entering international students. They want to attract outstanding students from all over the world, as this enhances their own reputation. Many more schools will award scholarships after the student has completed a specified number of credit hours and attained a specified minimum grade average.

Private Sources. There are quite a few private awards available to international students for study and research. For example, The Phelps-Stokes Fund of New York initiated the Bishop Desmond Tutu Southern Africa Refugee Scholarship Fund to aid Southern African Refugees who want to study in the U.S. Also, the United States Information Agency received approval for a $3.8 million dollar program which will bring students from Central America to the United States.

References. The following references contain additional information on ways to finance an education.

Entering Higher Education in the United States: A Guide for Students From Other Countries (College Board Publications, Department C43, Box 886, New York, NY 10101, USA).

Financial Resources for International Study (Sales and Correspondence Division, Institute of International Education, 809 United Nations Plaza, New York, NY 10017, USA).

Fullbright-Hays scholarship information may be obtained from Binational Educational Centers.

COSTS OF A COLLEGE EDUCATION IN THE UNITED STATES

Many students are unaware of the costs of attending a school in the United States. They will have to pay for tuition (cost of instruction), room (housing), board (food), fees, books, and and miscellaneous living expenses.

Tuition ranges from about $800 to $15,000 per academic year (not including summer sessions), depending on the institution attended. Two-year colleges are the least expensive, state (public) schools are in the middle, and private schools are the most expensive. Many U.S. students save money on tuition by completing their first two years at a two-year college, then transferring to a four-year school.

Room and board will cost students somewhere between $2500 and $4000 per year if they live and eat in the dormitory. Students who live off campus, may have to pay up to $300–$450 a month for room and board, depending on where the apartment is located, how many students are sharing the costs, and how well the apartment is maintained. Students should ask the college housing office for an estimate of how much off-campus housing will cost.

Special fees may equal several hundred dollars per year. Laboratory fees alone can run from $50 to $100 a year. Health insurance fees can be that high each semester. Student activity fees (which support the student center, campus newspaper and radio station, athletic events and miscellaneous student interest groups) can range from $25 to $200 a year.

Textbooks can cost up to $400 a year. Students may save some money by purchasing used books either from the campus bookstore, or from someone who has already taken the course. Be certain that the used book is still the one required by the course instructor. Students may also share books with a friend. Finally, students should find out which books are optional and which ones are required. Students need only purchase "required" texts.

The expenses noted above cover basics. Students will need additional money (at least $1500 per academic year) for personal care, clothing, entertainment, travel, transportation, and miscellaneous items. If students plan to return home for a visit, they must make sure to add this expense to their projected costs.

CHAPTER 8
Immigration and Deportation Information

VISAS AND PASSPORTS

International students cannot enter the United States to study without a visa and a passport. Passports are obtained from the student's own country. The visa is a stamp made on the passport by the American consulate.

Students may enter the United States under four different visa types: B-2, F-1, J-1, and M-1.

B-2. Tourist Visa

This visa is given to people who wish to come to the United States for sightseeing and pleasure. It is also given to prospective students who wish to look at schools before they make their final decision about which one to attend.

F-1. Non-Immigrant Student Visa

This visa is the most common type granted to students. An F-1 visa permits students to enter the United States temporarily to pursue an education. The visa is issued for the expected term of study (as long as four or five years). The following items are generally required before an F-1 will be issued.

- *A valid passport.* The passport must be valid for six months beyond the student's intended stay in the United States. Note: Canadian nationals are not required to have a passport.
- *Form I-20A* — A Certificate of Eligibility. This form is issued by a school, after the international student has been accepted (and, in some cases, paid a registration fee). Form I-20A indicates the name of the program to which the student has been admitted, the number of years of study expected in order to complete that program, the method by which the student will meet (or has met) English proficiency requirements, the cost of the program, and the student's means of financial support.
- *Proof of financial support.* The consul will require students to prove they have the funds necessary to meet the costs shown on Form I-20A. This proof may be a letter from a bank or from someone in the United States who agrees to be the student's sponsor. Be aware that the consul will make certain the sponsor has the necessary funds for this type of support. Students with dependents will have to show means of support for them as well.
- *Proof that the student intends to return to his or her home country.* The consul must be convinced that students do not plan to live in the United States when they are finished with their studies. In other words, the F-1 visa should not be viewed by students as a step toward permanent residency.

J-1. Exchange Visitor Visa

This visa is granted to students or teachers who are participating in an educational exchange program recognized as such by the United States Department of State. People who come to the United States on J-1 visas do so to teach, study, observe, conduct research, or receive special skills training. Visa requirements are as follows:

- *Form IAP-66* — Certificate of Eligibility for Exchange Visitor Status. Like Form I-20A, this form is issued by the United States institution which is sponsoring the student. Again, the exchange program must have been approved by the Department of State.
- *Proof of financial support.* Exchange visitors must show they have enough money to cover their expenses while in the United States.
- *Proof of English proficiency.* Exchange visitors must show their English is good enough to undertake the program.

Form IAP-66 or I-20A will be returned to the student after the visa has been issued. Don't lose it. Students must present their Form DSP-66 or I-20A at the port of entry when they arrive in the United States.

M-1. New Student Visa

This is a relatively new classification of student visa. It is granted to students who wish to pursue a vocational program of study. The prerequisites and restrictions of an M-1 visa are very similar to the F-1 visa, except that this visa is issued for a shorter period of time. Because vocational programs of study are generally shorter than traditional academic programs of study, students will find extending the duration of an M-1 visa difficult. They will also find changing their visa status from M-1 to F-1 very difficult.

F-2, J-2, M-2. Dependent Visas

F-2, J-2, and M-2 visas are granted to the spouse and children of recipients of F-1, J-1, and M-1 visas respectively. They permit dependents to enter the United States, but they do not allow dependents to take a paying job.

CHANGE OF SCHOOLS

Students may not transfer to a new institution without permission from the Immigration and Naturalization Service (INS) office. To receive permission, students must complete Form I-538, Application by Nonimmigrant Student (F-1) for Extension of Stay, School Transfer, or Permission to Accept or Continue Employment (J-1 visa holders should use form IAP-66). Students who transfer without permission risk having their visa cancelled.

CHANGE OF STATUS

Students who wish to apply to change their visa status must obtain a change of visa status form (Form I-506) from their foreign student advisor or designated school official, complete it, and forward it to the INS with appropriate documentation. Students should be warned that change of status is not always granted by the INS.

EMPLOYMENT

Students (or their dependents) who accept unauthorized employment in the United States are in violation of their visa status and may be deported. There are, however, instances when an international student may be granted permission to work.

Off campus employment. Students may work off campus if the work they are engaged in is considered part of their program of study, and if such work is not available in the students' own country. Students may also be permitted work off campus (after one year of study) if they can show an unforeseen change occured in their economic circumstances. In both cases, students must submit a completed Form I-538, and a letter from a school official stating that the work will not interfere with their program of study.

Campus employment. "On campus" employment is much easier to obtain. If the school indicates on Form I-20 that the international student's employment has not displaced a United States student, the international student need not fill out Form I-538. Students may work a maximum of twenty hours a week while school is in session. They may work "full time" (forty hours per week) during vacation periods.

Spouses of students may not work under any circumstances.

PASSPORT DOS AND DON'TS

DO:

- Sign your passport, as it is not valid unless has been signed by the bearer.
- Fill in the information required on the inside front cover of the passport. In the case of accident or other circumstance, it may be necessary to contact a designated agent or the next of kin.
- Register your passport if you mail it while abroad.
- Check the expiration date of your passport before you travel. Obtain a new one if needed.
- Check the visa requirements of all countries you plan to visit and obtain necessary visas from the appropriate foreign consular representatives. This is your responsibility.

DON'T:

- Lend your passport for use by a friend or stranger. Remember that it is an official government document for use only by the person or persons to whom it is issued.
- Use you passport as collateral or pledge.
- Alter, insert, or overwrite any information or entry in the passport. If a change is necessary, it must be made officially by authorized government agents.
- Tamper with the passport picture. Insist on getting a good one and then accept it as part of your official identification.
- Use the passport as a notebook, scrapbook, or autograph book.
- Pack your passport in your luggage. When traveling, keep it readily available, but safe.
- Tear or substitute pages in your passport.

DEPORTATION

Deportation is the expulsion of aliens who have been granted entry into the United States. The following grounds for deportation have been stated in very general terms, but will give students an idea of how strict the immigration rules are.

- Failure to comply with visa conditions. This includes acceptance of unauthorized employment, failure to attend classes, failure to maintain full-time student status, and failure to obtain timely extensions of stay.
- Conviction of crime after entry. The United States is a law abiding country. While in the United States, international students are expected to abide by U.S. law. Students may be deported if convicted of any crime of violence or moral turpitude. They may also be deported for commiting crimes related to narcotics (including marijuana abuse). Although there are provisions by which an international student may avoid deportation for some criminal convictions, there is no exception made for a narcotics or marijuana offense. Mere possession of marijuana will lead to deportation.
- Unlawful entry.
- Prostitution, or connection with the practice of prostitution. Although there are some places in the United States where prostitution has been made legal, this has no bearing on the alien's deportability.

Immigration and Naturalization Service

Please read instructions on PAGE 4

Certificate of Eligibility for Nonimmigrant (F-1) Student Status

Form Approved
OMB. No. RO397

PAGE 1

This page must be completed and signed in the U.S. by an authorized school official.

010033 B

Name of Student–Family Name (Capital Letters)	Given Name	Middle Name

Date of Birth (Mo., day, year)	Country of Birth	Country of Nationality

Name of School
School Official to be notified of student's arrival in U.S. (Name and Title)
Address of School (Include Zip Code)

Visa Issuing Post

For Immigration Official

1. This certificate is issued to the student named above for (check and fill out as appropriate):
- ☐ Initial attendance at this school.
- ☐ Continued attendance at this school after a temporary absence from the United States, or
- ☐ Use by spouse and/or children in acquiring nonimmigrant F-2 classification.
  The student's authorized stay, as it appears on his/her Form I-94, expires on (date): _____
- ☐ Other (specify): _____

2. The student named above has been accepted for a full course of study at this institution (complete each of the following):
Majoring in the field of _____
The student is expected to report to the school not later than (date) _____, and complete studies not later than (date) _____.

3. Proficiency in the English language ☐ **is** ☐ **is not required** (check and fill out as appropriate):
- ☐ The school has determined that the student has the required proficiency.
- ☐ If the student is not yet proficient, he or she will be given instruction consisting of _____.
- ☐ English IS NOT a requirement (explain): _____

4. This school estimates the student's average MONTHLY costs to be the following:

Tuition and fees	$ _____		
Living expenses	$ _____		
Expenses of dependent(s):	$ _____		
Other (specify):	$ _____	TOTAL	$ _____

5. This school has information showing the following as the student's means of support, estimated on a MONTHLY basis:

Personal funds of the student:	$ _____		
Family funds from abroad:	$ _____		
Funds from this school (Specify type): _____	$ _____		
Funds from another source (Specify type/source): _____	$ _____		
On-campus employment, if applicable:	$ _____	TOTAL	$ _____

6. Remarks (complete as appropriate): _____

7. This school is approved by the Immigration and Naturalization Service for attendance by nonimmigrant students (fill out all blanks):
Under the name of (School/School District) _____,
Approval was granted on (date) _____ and the school was given the file number of _____.

I CERTIFY under penalty of law that:
All information provided above was completed before I signed this form, and is true and correct to the best of my knowledge;
The school has determined that the above-named student's qualifications meet all standards for admission to the school;
The student will be required to pursue a full course of study as defined by 8 CFR 214.2(f)(1a); and
I am a designated official of the above named school and I am authorized to issue this form.

Signature of School Official	Title	Date Issued	Place Issued (city and state)

FORM I-20A (REV. 2/14/81)Y

I-20A Student

Please read instructions on PAGE 4

CERTIFICATE BY NONIMMIGRANT STUDENT
Under Section 101 (a) (15) (F) (i) of the Immigration and Nationality Act

1. My full name is: (Family name) (Given name) (Middle name)		**2.** My anticipated stay is (months or years):
3. My educational objective is: (Degree or certificate sought; Major field of study)	**4.** My passport was issued by (country): and the number on it is:	
5. I am financially able to support myself for the entire period of my stay in the United States while pursuing a full course of study, by: (State source and amount of support—Documentary evidence of means of actual support must be attached to this form):		
6. I last attended (Name of school) (City) (State) (Country)		
7. My major field of studies was:		**8.** I completed those studies on: (Date)
9. The person most closely related to me who lives OUTSIDE the United States is (Name):	(Relationship):	(Address):
10. The person most closely related to me who lives IN the United States is: (If you have no relative in the U.S., give the name of a friend.) (Family name): (Given name): (Middle name):	(Relationship):	(Address):

11. PLEASE READ CAREFULLY, and be sure that you understand the following, before signing below:

A. SCHOOL If I am applying for entry to the United States for the first time after being issued an F-1 visa, I will not be admitted unless I plan to attend the school specified in that visa. If, before I depart for the United States, I decide to attend another school, I will present an I-20 from that school to the issuing Consular office to have that school specified in my visa.

B. EMPLOYMENT I am not permitted to work off-campus or to engage in business unless I have received permission to do so from the Immigration and Naturalization Service. If I require employment, I may apply for permission to work (on Form I-538). My application must be based on financial need arising after receiving student status, or the need to obtain practical training. My alien spouse or child (F-2 Classification) may not work in the United States.

C. PERIOD OF STAY I am permitted to remain in the United States only while maintaining nonimmigrant student status. I must also maintain a passport which is valid for a period of no less than 6 months, unless exempt from passport requirements. I may not stay longer than authorized on my Form I-94, unless I apply to the Immigration and Naturalization Service (On Form I-538) for an extension. To get an extension, I must apply between 15 and 60 days before the date that my authorized stay expires. I may stay while the application is being processed and if it is approved, until the expiration of the extension.

D. NOTICE OF ADDRESS Each year I am in the United States on the first day of January, I must submit, by the 31st day of January, a notice of my address to the Immigration and Naturalization Service. I must also send a notice within 10 days after any change of address. Regardless of whether I move, I must file a notice of my address every 3 months. (The forms to be used to make each of the reports are available at any United States Immigration Office or Post Office.)

E. ARRIVAL/ DEPARTURE When I depart from the United States, I must give my "Arrival-Departure Record" (Form I-94) to a representative of the steamship or airline if I leave via a seaport or airport, to a Canadian Immigration Officer if I leave across the Canadian border, or to a United States Immigration Officer if I leave across the Mexican border. However, I may keep my I-94 for reentering the United States from Mexico or Canada, or from adjacent islands other than Cuba, if I return to the U.S. within 30 days.

F. SCHOOL TRANSFER I may remain in the United States only to pursue a full course of study at a specified school. If, after being admitted, I want to transfer to another school, I must first apply (on Form I-538) and be granted permission to do so. The application must be submitted to the Immigration and Naturalization Service Office having jurisdiction over the school from which I wish to transfer. A Form I-20, completed by the school to which I wish to transfer, must be with my application. My application will be denied if I have not taken a full course of study at the school I was last authorized to attend, unless I establish that failure to do so was beyond my control or was otherwise justified.

G. RE-ENTRY If I want to reenter the United States as a nonimmigrant student, after a temporary absence, I must be in possession of the following: (1) A valid student visa, unless I am exempt from visa requirements; (2) a passport valid for at least 6 months beyond the period of readmission, unless I am exempt from passport requirements; and (3) a current copy of Form I-20A and I-20B. (Only the "A" copy of Form I-20 is required if I am returning from a temporary absence from the United States, to continue studies at the school which the Immigration and Naturalization Service last authorized me to attend.)

H. PENALTY If I do not register at the school named in my "Arrival-Departure Record" (Form I-94), or if I stop attending school, or take less than a full course of study, or accept unauthorized employment, I fail to maintain my status and may be deported from the United States.

I AUTHORIZE the named school, and any school to which I transfer, to release any information from my records which is needed to determine if I am maintaining the lawful status in which I was admitted to the United States. I further authorize the school to report to the Immigration and Naturalization Service if I fail to register within 60 days of the time expected, to carry a full course of study, or to attend classes to the extent required, or if I become employed and/or terminate attendance at the school. The school is authorized to provide the Service with my name, country of birth, current address, and any other directory information on a regular basis or upon request.

I CERTIFY that all information provided on this form refers specifically to me and is true and correct to the best of my knowledge. I certify that I seek to enter or remain in the United States temporarily, and solely for the purpose of pursuing a full course of study at the school named on Page 1 of this form.

I AGREE to comply with the above terms and with any other conditions of my admission, and those of any extension of stay.

IMMIGRATION AND NATURALIZATION SERVICE

APPLICATION BY NONIMMIGRANT STUDENT (F-1) FOR EXTENSION OF STAY, SCHOOL TRANSFER, PERMISSION TO ACCEPT OR CONTINUE EMPLOYMENT, OR PRACTICAL TRAINING

PART I – TO BE FILLED IN BY ALL APPLICANTS

I AM APPLYING FOR (CHECK AND COMPLETE AS APPROPRIATE)

- ☐ EXTENSION OF TEMPORARY STAY UNTIL (SPECIFY DATE) _____
- ☐ PERMISSION TO TRANSFER TO ANOTHER SCHOOL
- ☐ PERMISSION TO ACCEPT OR CONTINUE PRACTICAL TRAINING
- ☐ PERMISSION TO ACCEPT EMPLOYMENT OR TO CONTINUE PREVIOUSLY AUTHORIZED EMPLOYMENT

PRESS FIRMLY – LEGIBLE COPY REQUIRED. PRINT OR TYPE YOUR NAME EXACTLY AS IT APPEARS ON YOUR ARRIVAL DEPARTURE RECORD FORM I-94. IF YOUR MAILING ADDRESS IN THE U.S. IS WITH SOMEONE WHOSE FAMILY NAME IS DIFFERENT FROM YOURS, INSERT THAT PERSON'S NAME IN THE C/O BLOCK.

1. MY NAME IS — FAMILY NAME (*Capital Letters*) | FIRST | MIDDLE

IN CARE OF — C/O | FILE NUMBER (*If Known*)

2. MAILING ADDRESS IN U.S. — NUMBER AND STREET (*Apt. No.*) | CITY | STATE | ZIP CODE

3. DATE OF BIRTH (*Month, Day, Year*) | COUNTRY OF BIRTH | COUNTRY OF CITIZENSHIP

4. DATE AND PORT OF LAST ARRIVAL IN UNITED STATES | DATE ON WHICH AUTHORIZED STAY EXPIRES

5. DATE OF INTENDED DEPARTURE FROM U.S.

6. SOCIAL SECURITY NUMBER (*If Known*)

7. PASSPORT ISSUED BY (*Country*) | PASSPORT EXPIRES ON (*Date*)

8. TELEPHONE NUMBER (*Include Area Code*)

9. Has an immigrant visa petition ever been filed in your behalf?
☐ Yes ☐ No If "Yes", where was it filed?

10. Have you ever applied for an immigrant visa or permanent residence in the U.S.?
☐ Yes ☐ No. If "Yes", where did you apply?

11. Have you been arrested or convicted of a criminal offense since entering the U.S.?
If "Yes" explain in detail.

☐ EXTENSION GRANTED TO (*Date*)

☐ EXTENSION DENIED V.D. TO (*Date*)

EMPLOYMENT ☐ GRANTED ☐ DENIED
PRACTICAL TRAINING ☐ GRANTED ☐ DENIED

TRANSFER ☐ GRANTED ☐ DENIED

THIS SECTION FOR GOVERNMENT USE ONLY

DATE OF ACTION

DD OR OIC OFFICE

IF TRANSFER GRANTED SHOW NEW SCHOOL, CITY, STATE.

12. Number, Street, City, Province (*State*) and Country of Permanent Residence

13. I ☐ AM ☐ AM NOT married. If married and you wish to apply for extension for your F-2 spouse and children, give the following: (See Instruction #1)

NAMES OF SPOUSE AND CHILDREN	DATE OF BIRTH	COUNTRY OF BIRTH	PASSPORT ISSUED BY (*Country*) AND EXPIRES ON (*Date*)	

NOTE: If spouse and children for whom you are seeking extension do not reside with you, give their complete address on a separate attachment to this application.

14. (*Insert "Have" or "Have Not"*) I _____ BEEN EMPLOYED OR ENGAGED IN BUSINESS IN THE UNITED STATES. IF YOU HAVE BEEN EMPLOYED OR ENGAGED IN BUSINESS IN THE UNITED STATES, COMPLETE THE REST OF THE BLOCK.

NAME AND ADDRESS OF EMPLOYER OR BUSINESS

KIND OF EMPLOYMENT OR BUSINESS	INCOME PER WEEK	DATES SUCH EMPLOYMENT OR BUSINESS BEGAN AND ENDED

15. MEANS AND SOURCE OF SUPPORT WHILE IN THE UNITED STATES

16. (COMPLETE THIS ITEM ONLY IF YOU ARE APPLYING FOR A SCHOOL TRANSFER)
I ☐ Have ☐ Have not been a full-time student at the school which I was last authorized by the Immigration and Naturalization Service to attend
(If you checked "Have not" state the reasons fully)

I am requesting this transfer because:

ATTACH YOUR FORM I-94 — *DO NOT SEND YOUR PASSPORT	RECEIVED	TRANS. IN	RET'D-TRANS. OUT	COMPLETED

FORM I-538 (Rev. 10-1-80)N

PART I – (CONTINUED) – TO BE FILLED IN BY ALL APPLICANTS

17. CHECK ITEM (A) OR (B) AND COMPLETE THE ITEM CHECKED *(See Instruction No. 1; also, if you are applying for a transfer see Instruction No. 4.)*

☐ (A) I AM ATTENDING SCHOOL

NAME AND LOCATION OF SCHOOL I AM ATTENDING IS

I ☐ WAS ☐ WAS NOT AUTHORIZED BY THE IMMIGRATION AND NATURALIZATION SERVICE TO ATTEND THAT SCHOOL. IF ANSWER IS "WAS NOT", ATTACH A STATEMENT GIVING NAME AND LOCATION OF THE SCHOOL YOU WERE LAST AUTHORIZED TO ATTEND AND WHY YOU ARE NOT ATTENDING THAT SCHOOL.

NUMBER OF CLASSROOM HOURS I ATTEND SCHOOL WEEKLY	DAY OR EVENING CLASSES (SPECIFY)	MAJOR FIELD OF STUDY	DATE EXPECTED TO COMPLETE

☐ (B) I AM NOT ATTENDING SCHOOL

MY REASON FOR NOT ATTENDING IS:

NAME AND LOCATION OF SCHOOL I WAS LAST AUTHORIZED BY IMMIGRATION AND NATURALIZATION SERVICE TO ATTEND	DATE OF GRADUATION OR LAST ATTENDANCE (SPECIFY)	MAJOR FIELD OF STUDY

PART II – TO BE FILLED IN BY APPLICANT FOR PERMISSION TO ACCEPT OR CONTINUE EMPLOYMENT OR PRACTICAL TRAINING

18. I DESIRE PERMISSION TO ACCEPT EMPLOYMENT FOR THE FOLLOWING REASON: *(CHECK ONE)*

(A) ☐ TO OBTAIN OR CONTINUE PRACTICAL TRAINING IN A FIELD RELATED TO MY COURSE OF STUDY AND RECOMMENDED BY THE SCHOOL.

(B) ☐ TO OBTAIN OR CONTINUE PART-TIME EMPLOYMENT NEEDED BECAUSE OF ECONOMIC NECESSITY WHICH AROSE AS A RESULT OF UNFORESEEN CHANGE IN FINANCIAL CIRCUMSTANCES. *(If you checked this item, explain in block 19).*

19. (FILL IN IF YOU CHECKED (B) IN ITEM 18.)

	My yearly expenses at time of initial F-1 entry were:	My yearly expenses currently are:
Tuition	$	$
Room		
Board		
Other (Specify)		
	— Totals —	

	My yearly income at time of initial F-1 entry was:	My yearly income currently is:
Parents	$	$
Other (specify)		
	— Totals —	

EXPLAIN the unforeseen change in your financial circumstances which arose after your entry into the United States and why parent, relative, organization or other sponsor is unable to furnish you the additional funds needed to cover expenses.

Occupation of Father _____

Annual Income $_____

Occupation of Mother _____

Annual Income $_____

20. DESCRIPTION OF PROPOSED EMPLOYMENT

21. (IF YOU CHECKED (A) IN ITEM 18 ABOVE, CHECK AND FILL IN THE APPLICABLE STATEMENT BELOW.)

☐ I HAVE PREVIOUSLY BEEN GRANTED PERMISSION TO ENGAGE IN EMPLOYMENT FOR PRACTICAL TRAINING FROM _____ TO _____
(date) *(date)*

☐ I HAVE PREVIOUSLY PARTICIPATED IN AN OFF-CAMPUS WORK-STUDY PROGRAM FROM _____ TO _____
(date) *(date)*

☐ I HAVE NEVER PREVIOUSLY BEEN GRANTED PERMISSION TO ENGAGE IN EMPLOYMENT FOR PRACTICAL TRAINING.

22. IF YOU HAVE PREVIOUSLY SUBMITTED AN APPLICATION TO ACCEPT OR CONTINUE EMPLOYMENT, FURNISH THE FOLLOWING INFORMATION.

OFFICE OF THE IMMIGRATION & NATURALIZATION SERVICE TO WHICH LAST SUBMITTED: *(CITY AND STATE)*	SUCH APPLICATION WAS ☐ GRANTED ☐ DENIED	DATE GRANTED OR DENIED

PART III – TO BE FILLED IN BY ALL APPLICANTS

23. Signature of Applicant

I CERTIFY under penalty of law that the information in this form is true and correct

_____
(Signature)

_____
(Date Signed)

24. Signature of Person Preparing the Form If Other Than Applicant

I DECLARE that this application was prepared by me at the request of the applicant and is based on all information of which I have any knowledge.

_____
(Signature)

_____ _____
(Address) (Date Signed)

PLEASE NOTE: Enclose your Temporary Entry Permit (Form I-94, ARRIVAL DEPARTURE RECORD) (See Instruction # 2)

PART IV-(Must be completed by an authorized official of the school student was last authorized by the Immigration and Naturalization Service to attend)

25 I hereby certify as follows:

The applicant: (Check one; If item (D) is checked, complete that item.)

(A) ☐ is taking a full course of studies at this school.

(B) ☐ is taking less than a full course of studies at this school.

(C) ☐ completed or will complete the course of study at this school on _____

(D) ☐ did not complete the course of studies but terminated attendance on _____ While attending, ☐ was ☐ was not taking a full course or studies.

If application is for permission to accept or continue employment: (Check one)

(A) ☐ the proposed employment is recommended for practical training of the student in the field of study. To the best of my belief such training will not be available in the country of his/her foreign residence.

(B) ☐ the proposed employment is recommended because of economic necessity due to an unforeseen change in the student's financial circumstances. The employment will not interfere with the student's ability to carry successfully a full course of study.

This school (or if approval was not in its own name, the _____ school district under which it operates or the _____ school of which it is a part) was approved for attendance by non-immigrant students by the Immigration and Naturalization Service, and such approval has not been withdrawn.

CHAPTER 9
A Glimpse at Life in the United States

Most international students experience conflicting emotions when studying outside of their country. There is the excitement of experiencing a new culture and the apprehension of leaving familiar surroundings and loved ones. There is the anticipation of meeting new people and sadness at leaving old friends. Hopes are high and students eagerly await the academic year and the beginning of the studies they hope will give them the knowledge to begin a new career.

These feelings are natural and shared by almost all international students. Most students (including U.S. students) become homesick during the first few weeks of school. The degree of that homesickness usually depends upon how different the student's own culture and customs are from those in the United States. As time goes by, students will find themselves fitting into activities very readily, making friends and enjoying the openness and freedom so characteristic of the American way of life. The quickest way to make friends and adjust to new surroundings is to appear cheerful, even when unhappy, and participate in campus activities.

CUSTOMS ON UNITED STATES CAMPUSES

A great deal could be written about attitudes and customs in the United States. What is most important, however, is to realize that these attitudes and customs vary from person to person, and from campus to campus. The following topics are especially delicate and will probably present the greatest cultural challenge for international students: clothing; friendship, dating, and sex; alcohol and drugs; cheating and grade competitiveness. Remember, seldom do two people in the United States behave in an identical manner, or even share identical opinions on any of these subjects. These are just generalizations.

Clothing. On most United States campuses, students dress very informally. In fact, some international students may find it sloppy in comparison to a more rigid dress code followed in their own country. The most common attire (for both men and women) is a pair of blue jeans, a shirt, a sweater, and a small backpack. These backpacks are used to carry textbooks, and notebooks. Students also dress informally off campus, even when they attend social activities such as athletic events and movies. In spite of this informality, however, a great many United States students do like to dress up, especially if they are going out to a restaurant, or to a dance.

Beyond blue jeans and a sweater, specific clothing suggestions are not possible as styles change almost constantly. International students might, therefore, want to reserve some money to buy clothes after they arrive in the United States. This way, they can see what "other people" are wearing.

Clothing also depends upon the climate. Students might want to allocate their clothing budget over several seasons so their clothing will be appropriate for whatever the weather.

Friendship. People from the United States are generally friendly, especially people from small towns, the south, west, and midwest. Do not, however, mistake friendship for interest in a deeper, more personal relationship. That takes time and getting to know one another better.

International students should not think a United States student unfriendly, when in many cases the problem is a language barrier. The majority of United States school systems do not require students to learn a language other than English. As a result, many students only speak English.

International students will undoubtedly meet some people from the United States who are unfriendly, or in some way predjudiced against them. Do not get upset. If these people are truly predjudiced, no amount of arguing is going to change them. Just try to avoid confrontations.

Sex. In the last decade, people's attitude toward sex has become more permissive. The decision, however, whether or not to establish a sexual relationship rests with the individuals involved. No assumptions should be made about another person's willingness. Most schools offer free birth control counseling and will provide birth control devices. Take advantage of these services.

Drugs and alcohol. Drugs, except those sold in pharmacies, or prescribed by a doctor, are illegal in the United States. Alcohol may not be consumed by people under twenty-one years of age (although some states allow 18–21 year olds to drink beer or wine). This does not mean that people in the United States do not take drugs or do not drink. They do. And, they can get into trouble with the police, who may arrest them, or with school authorities, who may suspend them. Breaking rules and regulations of any type is dangerous but especially when drugs and alcohol are involved. The consequences, especially for international students, are severe.

Students may be pressured to use drugs by fellow classmates. A firm "no" is the answer. Remember, a person cannot be forced to take drugs. If the problem persists, speak to your dorm advisor. That is what he or she is there for.

Cheating. Cheating or academic dishonesty (such as copying another person's work) is not tolerated in United States educational institutions. A person who cheats may be be given a failing grade, suspended, or even expelled from school. Students who do not cheat are expected to report violations to the professors.

Grade competitiveness. United States students realize high grades mean a better chance of employment, or a better chance of getting accepted into a top graduate school. As a result, there is often keen competition by students to get good grades. Most students work long and hard to maintain their grades at a high level. If students feel they have been graded incorrectly, they may discuss the matter with the instructor. If students are still dissatisfied, most schools have an official appeals procedure.

International students should be aware of this competitiveness and realize that they, too, must compete. Since many instructors grade on a curve — that is, adjust the grades to how the

class as a group performed — students receiving high grades raise the level of the curve and thereby make a passing grade more difficult to obtain.

There is no remedy for grade competitiveness. Students should expect to encounter it, and should work hard and not be dismayed or discouraged by this situation.

GLOSSARY

This glossary contains the most commonly used academic terminology, however, it is by no means inclusive. If students run into terms with which they are unfamiliar they should be certain to ask an admissions officer or their advisor for an explanation.

Academic Advisor. The person who guides a student in his or her course selection. Usually a member of the school's faculty or staff.

Academic Year. The period of time during which formal instruction is offered. It usually lasts from September to May or June. The period from June through August is not generally considered part of the academic year, even if summer sessions are held.

Accreditation. Recognition by an official agency that an institution has met certain academic standards.

ALIGU. American Language Institute of Georgetown University. ALIGU is used mainly to describe an English proficiency test given at United States embassies or consulates. The results of this test are accepted by some universities as an indication of a student's English proficiency.

Alumni. Those who have graduated from an institution.

Assistantship. Financial aid offered to a student in exchange for work. This work is generally offered by a particular college or university department. Students seeking assistantships should contact the department or the institution's financial aid office.

Associate Degree. A degree awarded by a two-year college.

Audit. To attend a course for purposes of attaining information only and not to receive a grade. Auditing students are generally not required to take examinations or turn in written assignments. No credit is given for an audit.

Baccalaureate Degree. A degree awarded by a four-year college or university.

Bursar. The school treasurer. Also, the person to whom a student pays tuition and fees.

Calendar. The formal schedule of academic year events. Includes examination periods, registration periods, and school holidays.

Campus. The physical grounds and buildings of the institution. A campus map will show students where classes and other events are held.

Catalog (Bulletin). A book describing an institution's courses, regulations, fees, tuition, faculty, location, entrance and other academic requirements, scholarship and financial aid information.

Class. This word has several definitions. It can refer to a course of instruction (English class); it can refer to a group of students taking a particular course together (class of English students); or it can mean all the students who are in the same year of study (the freshman class).

Class Card. The card which you retain at registration and which will allow you to register for and attend a particular class or section.

Class Rank. The academic standing of a student in relation to other students at the same school in the same year of study. For example, the student whose grades placed him exactly halfway between the first and last person in an engineering program of one hundred people would have a class rank of 50/100.

Commencement. The ceremonies held upon completion of a student's studies. Also called graduation.

Comprehensive Examination. A very thorough examination sometimes given to students at the conclusion of their studies to determine their knowledge of the major. Students must pass this examination to be eligible for their degree. Comprehensives are almost always required on both the masters and doctorate levels.

Conditional Admission. Colleges might accept some students who do not meet admission standards on the condition that they meet those standards soon after they enroll (for example, students may be told they need to attain a higher level of English proficiency).

Consortium. Colleges which have joined together to make their collective resources available to all students.

Cooperative Education. A program whereby students alternate periods of study with periods of employment at a job obtained by the school for the student. The job is usually in a field related to the student's major. It is difficult to find jobs in the United States for international students, so international students should not assume they will be placed after making a cooperative education application.

Credit. A unit (generally numerical) given by an institution to students who have successfully completed a course. A student must earn a specified number of credits before he or she will be allowed to graduate. The number of credits given for a particular course is contained in the institution's catalog or bulletin.

Credit by Examination. Many institutions will allow students to gain credits without taking a course if they are successful in passing an examination which covers the material presented in the course.

Curriculum. The course of study offered at an academic institution. There will be one curriculum (series of courses) required for electrical engineers and another required for liberal arts majors.

Dean's List. A listing of students who receive special recognition for academic excellence. Criteria for the dean's list varies among institutions and programs.

Dissertation. A research thesis or essay or paper written on a particular subject as part of the requirement for a doctoral degree.

Dormitory (Residence Hall). A building on campus used to house students.

Elective. A course students may choose to take which is not part of the required curriculum.

Faculty. The group of professors and instructors who make up the teaching staff of an institution.

Fellowship. A financial grant given to a graduate student in support of his or her research

4-1-4 Calendar. An academic year divided into four-month, one-month, and four-month semesters.

Fraternity. Social organizations of male students which are identified by letters of the Greek alphabet.

Freshman. An undergraduate student in his or her first full academic year. May also be used to classify a student in the first year of high school.

Full Load. A minimum number of courses a student must take to be considered a full-time student. The number is usually different for undergraduate and graduate students.

Grade. Two meanings. Grade can refer to the number or letter given to evaluate a student's performance on an assignment, examination, or the entire course. Grade can also refer to one of the twelve years of pre-college education (first grade, second grade).

Grade-Point Average (GPA). An average grade which is derived from a formula which considers grades received and number of credit hours for each course taken. The GPA is used in determing who should be on the dean's list and who should be on probation or suspended. It is also used in calculating a student's class rank.

Graduate. Three meanings. Graduate can refer to the level of study beyond the baccalaureate. Graduate can also refer to a person who has successfully completed high school or college. Finally, graduate may be used as a verb to describe the act of receiving a high school or college diploma.

Graduation. See Commencement.

Humanities. The branch of learning which constitutes the backbone of the liberal arts education. For example, languages, history, literature, and philosophy.

International Student Advisor. A staff member who is qualified to counsel international students on visa and immigration rules, as well as a wide range of personal matters (adjusting to life in the United States, for example).

Junior. An undergraduate student in his or her third full year of college. May also be used to classify a student in the third year of high school.

Major. The field or subject which a student has chosen as his or her principal area of study. For example, mathematics, engineering, economics, anthropology, biology, art, French.

Minor. A subject or field which a student has chosen as an area of study secondary to his or her major.

Orientation. A period (usually 2–4 days) in which students are introduced to the college, its programs, and its facilities.

Prerequisite. A course which a student must complete before being permitted to enroll in another course.

Program. The course of studies devoted to one major field of study. For example, a program in civil engineering.

Quarter. One of the four terms (grading periods) in an academic year. A quarter usually lasts from eight to ten weeks (see Semester and Trimester).

Registrar. The person at the college or university who is responsible for student enrollment (and academic) records.

Registration. The process of choosing a program and having it approved. Students usually register every term.

Scholarship. Also called a grant. This is money that does not have to be repaid (loans must be repaid). Scholarships for international students are generally based on financial need as well as academic merit.

Semester. One of two terms (grading period) in an academic year. A semester usually lasts from thirteen to fifteen weeks (see Quarter and Trimester).

Senior. An undergraduate student in his hor her fourth full year of college. May also be used to classify a student in the fourth year of high school.

Social Security Number. A number assigned by the United States government to U.S. citizens. Many application forms request that students list their number, which may then become their student identification number. Students who do not have a social security number should leave this space blank. The institution will issue a dummy social security number to act as a student identification number.

Sophomore. An undergraduate student in his or her second full academic year. May also be used to classify a student in the second year of high school.

Sorority. Social organization of female students which are identified by letters of the Greek alphabet.

Special or Unclassified Student. A student taking courses in an institution who is not enrolled or registered in a degree-granting program.

Syllabus. A course outline prepared for students by the professor.

TOEFL. Test of English as a Foreign Language. Grades from this test are very often used to determine the admissibility of international students or the level at which the students should be placed in English-language courses.

Transcript. The official record of a student's courses and grades. Most institutions require that transcripts be sent directly from the institution at which the grades were earned.

Trimester. One of three terms (grading periods) in an academic year. A trimester usually lasts from ten to twelve weeks (see Semester and Quarter).

Tuition. The cost of the academic program undertaken. Tuition may be paid before each term (semester, quarter, trimester) or for a full academic year.

Tutor. A private teacher who assists students outside normal classroom periods.

Undergraduate. A college student who has not completed a bachelor's degree.

Zip Code. A five- or nine-digit number used in an address when sending mail to or within the United States. This number aids the post office in delivering mail.

The following states have no INS office. These states come under the jurisdiction of the district listed with the state. You must check with that district to see whether the state is serviced by a suboffice within the district.

Alabama (Atlanta)
Arkansas (New Orleans)
Delaware (Philadelphia)
Idaho (Helena)
Iowa (Omaha)
Kansas (Kansas City)
Mississippi (New Orleans)
New Hampshire (Boston)
New Mexico (El Paso)
North Dakota (St. Paul)
South Carolina (Atlanta)
South Dakota (St. Paul)
West Virginia (Philadelphia)
Wyoming (Denver)

Part 5

College And University Data

The master list is organized by state, with schools listed alphabetically within each state. A blank in any column indicates that the school did not explain its policy. Check with these schools for more information.

NAME OF INSTITUTION: Self-explanatory.

TYPE: Public; private, non-sectarian; or private, sectarian. If the school is private sectarian, the church or denomination is listed according to the abbreviations below:

African Methodist Episcopal	AME
American Baptist	A. Bapt.
American Lutheran	A. Luth.
Assembly of God	Assembly
Baptist	Baptist
Bible Church	Bible
Catholic	Catholic
Christian	Christian
Christian Reformed Church	Chris. Ref.
Church of Christ	Ch. Christ
Church of God	Ch. of God
Church of the Nazarene	Ch. Nazarene
Congregational	Congreg.
Disciples of Christ	Dis. Christ
Free Methodist Church	Free Meth.
Free Will Baptist	Free Will
Grace Brethren	G. Breth.
Lutheran	Lutheran
Mennonite	Mennonite
Methodist	Methodist
Missouri Synod	Mo. Synod
Mormon	Mormon
Presbyterian	Presby.
Protestant	Protest.
Quaker	Quaker
Reformed Church of America	Reformed
Roman Catholic	R. Cath.
Seventh Day Adventist	7th Day
Southern Baptist	S. Bapt.
United Brethren in Christ	U. Breth.
United Church of Christ	U. Ch. Christ
United Methodist	U. Meth.
United Presbyterian	U. Presby.

YEARS: The school is either a **four year** or a **two year** institution. In most cases, the NAME OF INSTITUTION will indicate whether the school is a college or a university.

COST: This figure includes only out-of-state tuition and fees; it does not include room, board, books, travel, or miscellaneous expenses.

ENROLLMENT:
MEN: Total male enrollment
WOMEN: Total female enrollment
IM: Total international male enrollment
IW: Total international female enrollment

These figures include undergraduates only. In cases where the school did not report the breakdown between male and female students, the total number is put in parentheses.

TESTS: Only tests required for admission are listed. The **TOEFL** (Test of English as a Foreign Language) is almost always required. **"SAT/ACT"** means that the school requires either SAT (Scholastic Aptitute Test) or ACT (American College Testing). Most schools require the SAT or ACT in lieu of the TOEFL for students whose primary language is English. If the school stated their average test score for international students, that figure is included, for example, TOEFL—500. **"AT"** (Achievement Tests) indicates achievement tests are required for admission. Most schools which require achievement tests require three of them—check with the school to determine which achievement tests are required. **"Other"** means other tests are required for admission (the student should contact the school), and **"None"** means no tests are required for admission.

CAMPUS VISIT: An **"X"** means a campus visit is required; an **"R"** means a campus visit is recommended.

INTERVIEW: An **"X"** means an interview is required; an **"R"** means an interview is recommended; an **"A"** means the interview may be held abroad with a representative of a United States educational/cultural/governmental agency.

APPLICATION FEE: If the school has an application fee and stated the amount, it is listed in this column. **"Yes"** means the school has an application fee but did not state it, and **"None"** means the school does not have an application fee. **"W"** means the application fee can be waived, and **"R"** means the application fee can be refunded. (For example, $20-W means the application fee is $20 and can be waived.) The application fee may often be waived if the applicant's home country has a currency restriction in effect.

SEPARATE APPLICATION: **"Yes"** means there is a separate application for international students and **"No"** means there is not a separate application. In most cases, the separate application can be obtained from the contact person listed in the GENERAL INFORMATION section at the end of the book.

DEFERRED ADMISSION: **"Yes"** means admission may be deferred; **"No"** means admission may not be deferred.

OFFERED ADMISSION: This column indicates the percentage of international students meeting admissions requirements who were offered admission in the 1985 academic year.

TRANSFERS: **"Yes"** means the institution accepts international transfer students; **"No"** indicates it does not.

AVERAGE AWARD: This column lists the average dollar amount awarded to international students who received financial aid.

AWARD TYPE: This column indicates the type of financial aid available to international students. The following specific codes are used in this column:

CG = College/University Grant, Scholarship, or Tuition Waiver
PG = Private Grant or Scholarship
WS = Work-study
CL = College/University Loans
PL = Private Loans
Other = Other Sources
$ = Specific Scholarships (see GENERAL INFORMATION section)

ON-CAMPUS: Institutions were asked to rate on-campus, part-time employment opportunities for international students as **Excellent (Ex), Good, Fair,** or **Poor**. Off-campus employment opportunities are rare because visa and immigration restrictions prohibit most international students from working off-campus.

HOUSING: **"Yes"** means the institution guarantees housing for international students; **"No"** indicates it does not guarantee housing, although there is often housing available (see below).

TYPE: The following specific codes indicate what kind of housing the institution offers to international students:

A = Coed Dorms
B = Women's Dorms
C = Men's Dorms
D = International House
E = Fraternities
F = Sororities
G = College/university owned and operated apartments
H = Married student housing
I = Commuter campus—no housing
J = Language Housing
K = Other

CALENDAR: The following specific codes indicate the calendar year on which the school operates.

Sem = Semester
Tri = Trimester
Qtr = Quarter
Other = Other Calendar System
4-1-4 = Two semesters with one month interim

START DATE and **ORIENTATION:** The month and day listed indicate when the fall term begins for the 1986/87 academic year. (The 1987/88 start date will be approximately the same—check with the school.) An **"X"** indicates the student should check with the school. **"Yes"** means there is a special international student orientation program; **"No"** indicates the school does not have a special orientation program for international students. (For example, 9/2-Yes means the fall term begins on September 2, and the school has an international student orientation program.)

ESL: **"Yes"** means the institution offers an English as a Second Language program; **"No"** means it does not.

Part 6

Scholarship And General Information

GENERAL INFORMATION: This section lists more detailed information about the schools surveyed. Four-year institutions which did not submit any data are listed by name and address only, so that students may include them in their college search.

NAME OF INSTITUTION: Self-explanatory

ADDRESS: Self-explanatory

PHONE: To call the United States from abroad, dial the country code for the country where the call originates, then the U.S. country code (1), then the 3-digit area code, then the 7-digit number.

CONTACT: The school suggests that the applicant contact this person for more information regarding admission requirements. For example, there are almost always additional admission requirements for nursing and engineering programs. Art, music, and theater programs generally require a portfolio or audition (slides and tapes may be accepted).

INTERNATIONAL ENROLLMENT: This section lists the distribution of male and female international undergraduates according to eight geographic regions. (An "*" appears where graduate students are included in the total figures.)

Africa
Western Europe
Eastern Europe
Australia/New Zealand
Middle East
Far East
Central/South America
Other (includes Canada, Pacific Islands, Carribbean Islands)

FINANCIAL AID INFORMATION: The following information is included about the financial aid awards that the school offers to international students:

Name of program: This is the name of the scholarship.

Number of awards: Self-explanatory.

Value amount/range: Self-explanatory.

Resident of: Some awards stipulate that the student be a resident of a particular foreign country. Unless otherwise stated, students from all countries are eligible for the award.

Selection Criteria:

Academic achievement important: This phrase is used to describe an award which considers academic achievement an important criterion.

Demonstrated financial need: This phrase is used to describe an award which considers the amount of a student's financial need an important criterion.

Financial need not considered: This phrase indicates that financial need is not a criterion for the award.

SAT, ACT, TOEFL: Some scholarships require a minimum score on one of these standardized tests.

Nomination: Some awards require nomination by country or secondary school. Unless otherwise stated, students do not have to be nominated to qualify for an award.

Fields of study: Some schools grant awards only to students who major in a particular field at the school. Unless otherwise stated, all fields of study are acceptable.

Renewability: Most scholarships are renewable. The number of years of renewability and the minimum GPA required for renewability are indicated.

Separate application: If the award requires a separate application, students can obtain this application from the office indicated. Unless otherwise stated, the award does not require a separate application.

Application and notification deadline: Some schools have indicated their application and notification dates: A "**rolling**" deadline means that scholarships are awarded on a first-come, first-served basis.

Award eligibility: All awards are open to international students. In some instances the award is also open to international transfer students or U.S. students.

Other: There are often other scholarship requirements. Check with the school for scholarship information not included.

ACADEMIC INFORMATION:

CURRICULUM EMPHASIS: This section indicates the focus of the school's curriculum, for example, liberal arts, engineering, business, education, health sciences.

OPTIONS: The following options are listed under the institutions that offer them:

Accelerated Study: Schools with this option allow their students to accelerate their undergraduate studies. For instance, students can complete four years of coursework in three years under an accelerated study program.

Cooperative Education: This program allows students to attend college while they work at a job in a field related to their major. Students either take classes and work during the same semester for several semesters, or they alternate classes with work every other semester.

Double Majors: A student with a "double major" has majored in not one, but two disciplines.

Dual Degrees: Students who are "double majors" often receive a degree in only one of the majors. Schools offering dual degrees award two degrees to double majors—one for each major.

General Education Requirements: Some schools require that their students take at least one course in several "core" areas (such as English, humanities, fine art, science, and social science). These general education courses introduce the student to a wide variety of important subjects.

Graduate Schools: Only universities have graduate schools such as Schools of Arts and Sciences, Law, Education, Medicine, and Engineering. Graduate students study at these schools, but undergraduates may be allowed to take courses.

Honors Program: This program offers honors or advanced courses to the undergraduates enrolled in the program.

Independent Study: In an independent study course, the student does not attend a formal class but selects a topic

and readings to study independently. Meetings with a sponsoring professor are usually required.

Intensive English Center: Several schools have an area on campus where students can go to learn and practice their English. Such a center may have instructors, tapes, discussions groups, and other aids.

Internships: An internship is a job that helps the student becme more familiar with a particular field or career. Most internships are during the fall and spring semesters, but some are offered in the summer too. Generally, internships are non-paying positions.

Pass/Fail Grading: Instead of receiving a letter grade for a particular course, students often elect to take a course "pass/fail". A grade of "pass" indicates the student has passed the course, while a grade of "fail" indicates the student has failed the course.

Phi Beta Kappa: A liberal arts honor society (founded in 1776) which recognizes outstanding students. Of the 2000 four-year colleges in the U.S., only 237 of them are entitled to induct their graduates into Phi Beta Kappa.

Self-designed Majors: A student may wish to design a major rather than choose from the majors offered by the school. This option is particularly helpful to students who wish to create their own interdisciplinary area of study.

Special Facilities: This section includes facilities such as computer centers, museums, planetariums, and writing labs.

Suru Manek's Story

Forty years ago, Suru Manek was born in OL'Kalou, Kenya, a tiny village in the heart of Africa. His village was without running water, electricity, health centers, or schools. Most people made meager livings by farming or barter trading. Learning meant helping one's parents with chores.

In OL'Kalou, formal education of any kind was a luxury few people could afford. The primary school consisted of one small room, one poorly paid teacher, and twenty children, ranging in age from five to thirteen. Teachers generally lacked a high school education, and seldom stayed for more than a few months. They left as soon as a better opportunity came along. Academic instruction was limited to learning the alphabet, numbers, and the stories with which the teacher was familiar.

When Suru was thirteen, he took a national high school admissions examination. Places in high schools were extremely limited. Segregation meant Suru could only attend schools for Asians. The examination was very difficult, and Suru failed every subject. He spoke to the unsympathetic headmaster who reluctantly offered him another chance the following year. This time Suru passed and was given the opportunity to attend high school.

Suru studied very hard and graduated from high school with good grades. His desire for education was not satisfied; he knew he still wanted to go to college. To earn money, he spent seven years working in his father's village store.

During this time, Suru came into contact with several United States Peace Corps volunteers and learned much about the United States. When he had saved $3000, he applied for admission to several colleges. He was accepted by a few, but chose Central Michigan University because "University" sounded better to him than "college." He did not realize that in the United States, both are places of higher learning.

The first surprise when he entered the United States was the cost of living. Everything seemed very expensive! Suru realized he would only be able to study for a short time unless he found a job or a scholarship. He studied very hard, but he also found time to earn money. He washed dishes in the campus cafeteria, assisted science professors with their laboratory work, mowed lawns, shoveled snow, and gave lectures about the people of Africa. He finally obtained a student assistantship under a work-study program. During the summer Suru found friends who made him a part of their family (for this, the Millars and Volgstadts will be remembered always).

Suru graduated with high honors (Magna Cum Laude), and chose to continue his education at the University of Toledo. There he received a Graduate Assistantship so he did not have to pay tuition. Campus jobs paid his other expenses. Again, Suru graduated with high honors, with a Masters Degree in International Business and Business Economics.

Today, Suru is a United States citizen. He owns his own business and travels overseas frequently. Suru attributes his comfortable life and good standard of living to his excellent education; an education which would not have been possible had he remained in his small African village.

This book was produced at Suru's request. When he was looking for places to study in the United States, he found no such information available. He went through tremendous hardship and cost — in the form of time, money, and personal endurance. He wanted to make it easier for everyone else. The result is this book. May your search for higher education be quicker, easier, and equally rewarding.
